Index of Applications

Part I: Exploring and Understanding Data

Chapter 1: Stats Starts Here

1.1 What Is Statistics?

1.2 Data

1.3 Variables

1.4 Models

Chapter Review

Tech Support

Exercises

Student Activity

Chapter 2: Displaying and Describing Data

2.1 Summarizing and Displaying a Categorical Variable

2.2 Displaying a Quantitative Variable

2.3 Shape

2.4 Center

2.5 Spread

Chapter Review

Tech Support

Exercises

Table of Contents

Student Activity

Chapter 3: Relationships Between Categorical VariablesContingency Tables

3.1 Contingency Tables

3.2 Conditional Distributions

3.3 Displaying Contingency Tables

3.4 Three Categorical Variables

Chapter Review

Tech Support

Exercises

Student Activity

Chapter 4: Understanding and Comparing Distributions

4.1 Displays for Comparing Groups

4.2 Outliers

4.3 Re-Expressing Data: A First Look

Chapter Review

Tech Support

Exercises

Student Activity

Chapter 5: The Standard Deviation as a Ruler and the Normal Model

5.1 Using the Standard Deviation to Standardize Values

5.2 Shifting and Scaling

5.3 Normal Models

5.4 Working with Normal Percentiles

5.5 Normal Probability Plots

Chapter Review

Tech Support

Exercises

Student Activity

Review of Part I: Exploring and Understanding Data

Part II: Exploring Relationships Between Variables

Chapter 6: Scatterplots, Association, and Correlation

6.1 Scatterplots

6.2 Correlation

6.3 Warning: Correlation Causation

*6.4 Straightening Scatterplots

Chapter Review

Table of Contents

Tech Support

Exercises

Student Activity

Chapter 7: Linear Regression

7.1 Least Squares: The Line of Best Fit

7.2 The Linear Model

7.3 Finding the Least Squares Line

7.4 Regression to the Mean

7.5 Examining the Residuals

7.6 R^2 The Variation Accounted for by the Model

7.7 Regression Assumptions and Conditions

Chapter Review

Tech Support

Exercises

Student Activity

Chapter 8: Regression Wisdom

8.1 Examining Residuals

8.2 Extrapolation: Reaching Beyond the Data

8.3 Outliers, Leverage, and Influence

8.4 Lurking Variables and Causation

8.5 Working with Summary Values

*8.6 Straightening Scatterplots The Three Goals

*8.7 Finding a Good Re-Expression

Chapter Review

Tech Support

Exercises

Student Activity

Chapter 9: Multiple Regression

9.1 What Is Multiple Regression?

9.2 Interpreting Multiple Regression Coefficients

9.3 The Multiple Regression Model Assumptions and Conditions

9.4 Partial Regression Plots

*9.5 Indicator Variables

Chapter Review

Tech Support

Exercises

Student Activity

Table of Contents

Review of Part II: Exploring Relationships Between Variables

Part III: Gathering Data

Chapter 10: Sample Surveys

10.1 The Three Big Ideas of Sampling

10.2 Populations and Parameters

10.3 Simple Random Samples

10.4 Other Sampling Designs

10.5 From the Population to the Sample: You Can't Always Get What You Want

10.6 The Valid Survey

10.7 Common Sampling Mistakes, or How to Sample Badly

Chapter Review

Tech Support

Exercises

Student Activity

Chapter 11: Experiments and Observational Studies

11.1 Observational Studies

11.2 Randomized, Comparative Experiments

11.3 The Four Principles of Experimental Design

11.4 Control Groups

11.5 Blocking

11.6 Confounding

Chapter Review

Tech Support

Exercises

Student Activity

Review of Part III: Gathering Data

Part IV: From the Data at Hand to the World at Large

Chapter 12: From Randomness to Probability

12.1 Random Phenomena

12.2 Modeling Probability

12.3 Formal Probability

12.4 Conditional Probability and the General Multiplication Rule

12.5 Independence

12.6 Picturing Probability: Tables, Venn Diagrams, and Trees

12.7 Reversing the Conditioning and Bayes Rule

Chapter Review

Table of Contents

Exercises

Student Activity

Chapter 13: Sampling Distribution Models and Confidence Intervals for Proportions

13.1 The Sampling Distribution Model for a Proportion

13.2 When Does the Normal Model Work? Assumptions and Conditions

13.3 A Confidence Interval for a Proportion

13.4 Interpreting Confidence Intervals: What Does 95% Confidence Really Mean?

13.5 Margin of Error: Certainty vs. Precision

*13.6 Choosing the Sample Size

Chapter Review

Tech Support

Exercises

Student Activity

Chapter 14: Confidence Intervals for Means

14.1 The Central Limit Theorem

14.2 A Confidence Interval for the Mean

14.3 Interpreting Confidence Intervals

*14.4 Picking Our Interval Up by Our Bootstraps

14.5 Thoughts About Confidence Intervals

Chapter Review

Tech Support

Exercises

Student Activity

Chapter 15: Testing Hypotheses

15.1 Hypotheses

15.2 P-Values

15.3 The Reasoning of Hypothesis Testing

15.4 A Hypothesis Test for the Mean

15.5 Intervals and Tests

15.6 P-Values and Decisions: What to Tell About a Hypothesis Test

Chapter Review

Tech Support

Exercises

Student Activity

Chapter 16: More About Tests and Intervals

16.1 Interpreting P-Values

16.2 Alpha Levels and Critical Values

Table of Contents

16.3 Practical vs. Statistical Significance

16.4 Errors

Chapter Review

Exercises

Student Activity

Review of Part IV: From the Data at Hand to the World at Large

Part V: Inference for Relationships

Chapter 17: Comparing Groups

17.1 A Confidence Interval for the Difference Between Two Proportions

17.2 Assumptions and Conditions for Comparing Proportions

17.3 The Two-Sample z-Test: Testing the Difference Between Proportions

17.4 A Confidence Interval for the Difference Between Two Means

17.5 The Two-Sample t-Test: Testing for the Difference Between Two Means

*17.6 Pooling

*17.7 The Standard Deviation of a Difference

Chapter Topics Review

Tech Support

Exercises

Student Activity

Chapter 18: Paired Samples and Blocks

18.1 Paired Data

18.2 The Paired t-Test

18.3 Confidence Intervals for Matched Pairs

18.4 Blocking

Chapter Review

Tech Support

Exercises

Student Activity

Chapter 19: Comparing Counts

19.1 Goodness-of-Fit Tests

19.2 Chi-Square Test of Homogeneity

19.3 Examining the Residuals

19.4 Chi-Square Test of Independence

Chapter Review

Tech Support

Exercises

Table of Contents

Student Activity

Chapter 20: Inferences for Regression

20.1 The Regression Model

20.2 Assumptions and Conditions

20.3 Regression Inference and Intuition

20.4 The Regression Table

20.5 Multiple Regression Inference

20.6 Confidence and Prediction Intervals

*20.7 Logistic Regression

*20.8 More About Regression

Chapter Review

Tech Support

Exercises

Student Activity

Review of Part V: Inference for Relationships

Parts IV Cumulative Review Exercises
