The market system

Introduction: what is economics all about?

The subject matter of economics

Positive and normative statements

Scientific method

Different answers to the same questions

Conclusions

Summary

Questions

Data response A

Data response B

Mathematical techniques in economics

How to use this chapter

The use and abuse of statistics

Indices

Statistics

Summary

Table of Contents

Questions

Data response A

Data response B

Data response C

The economic problem: resources, scarcity and choice

Wants and needs

The factors of production

The division of labour

Economies of scale

New technology

Increasing costs and diminishing returns

The law of increasing costs

International trade

Summary

Questions

Data response A

Data response B

The allocation of resources in competitive markets

The price system

Demand

Supply

Equilibrium prices

Demand in detail

The price system assessed

Summary

Questions

Data response A

Data response B

Elasticities of demand and supply

Introduction

Elasticity of demand

Price elasticity of demand and the firms decision making

Table of Contents

The calculation of price elasticity of demand
Factors determining price elasticity of demand
Arc elasticity
Point elasticity
Income elasticity of demand
Cross elasticity of demand
Price elasticity of supply
Summary
Questions
Data response A
Data response B

Markets in movement

Some important ideas reviewed
Changes in market price
The effect of time on prices
Government interference with equilibrium prices
Taxes and subsidies
Problems with demand and supply analysis
Summary
Questions
Data response A
Data response B

The business organisation, costs and profits

Types of business organisation
Legal forms of firms
Costs of production
Profits
Conclusion
Summary
Questions
Data response A
Data response B

Table of Contents

Market structures

- Supply
- Profit maximisation
- Types of competition
- Alternative objectives
- Summary
- Questions
- Data response A
- Data response B

Market failure and government intervention

The mixed economy: market failure vs government failure

- What is a mixed economy?
- The origins of the mixed economy
- Criteria for government intervention in the market
- The allocative role: provision of goods and services
- The distributive role: transfer payments
- Criteria for the allocation of resources
- Conclusion
- Summary
- Questions
- Data response A

Government intervention in the market

- Introduction
- Case study 10.1 the growth of public expenditure
- Reasons for growth in public expenditure
- Strategies for the control of public expenditure
- Case study 10.2 reform of the NHS: technical efficiency and transactions costs
- How to pay for the service?
- Case study 10.3 markets in education: allocative efficiency
- Case study 10.4 monopoly and privatised industries
- Case study 10.5 regional problems

Table of Contents

Summary

Markets in operation

The market in practice: agriculture, housing and labour

Introduction

Case study 11.1 agricultural prices

Features of the agriculture industry

Recent developments in policy

A comparison of three policies

Case study 11.2 the housing market

The public sector

The voluntary sector

The owner occupied sector

Case study 11.3 minimum wage legislation

Summary

The leisure industry

The meaning of leisure

Travel and tourism

Some economic aspects of the English Premier League

Conclusion

Summary

Questions

Data response A

The economics of the environment

An introduction to the environment

Policies to deal with the environment

Pollution characteristics

Case study 13.1 global warming

Policies

Case study 13.2 ozone depletion

Case study 13.3 rubbish and recycling

Policy

Table of Contents

Summary

Questions

Transport and the economy

Introduction

Case study 14.1 road congestion

Case study 14.2 privatising a loss-making monopoly

Privatisation

Accountability

Alternative methods of privatisation

Case study 14.3 air transport

Case study 14.4 the channel crossing: intermodal competition

Summary

The national economy

What is the macroeconomy?

Pre-Keynesian attitudes

Macroeconomics

Conclusion

Summary

Questions

Data response A

Measuring the macroeconomy

The four macroeconomic policy targets

The circular flow of national income

The components of national income

National income accounts

Growth

Conclusion

Summary

Questions

Data response A

Analysing the macroeconomy

Table of Contents

The aggregate demand and supply curve approach

The derivation of the aggregate supply curve

Conclusion

Summary

Questions

Data response A

Managing the macroeconomy: problems and policies

The major objectives of government policy

1945 to the early 1970s

1974-1982

1982-1996

1997 onwards

International interdependence and globalisation

Conclusion

Summary

Questions

Data response A

Business economics

The size and growth of firms

The size of firms

The growth of firms

Multinational firms

The continuation of the small business

Conclusion

Summary

Questions

Data response A

Data response B

Costs in the short run and the long run

Average costs in the short run

Average costs in the long run

Table of Contents

The mathematics of marginal cost

Changes in costs

Conclusion

Summary

Questions

Data response A

Data response B

Competitive supply

The best profit output

The supply curve

The optimality of perfect competition

Summary

Questions

Data response A

Data response B

Price and output under imperfect competition

Perfect and imperfect competition

Profit-maximising techniques

The equilibrium of the monopolist

The equilibrium of the monopolistically competitive firm

Oligopolistic competition

Managerial and behavioural theories revisited

Contestable markets

Limit pricing

Conclusion

Summary

Questions

Data response A

Data response B

Aspects of monopoly

Governments and monopoly

Pricing problems

Table of Contents

Discriminating monopoly

Monopoly assessed

Conclusion

Summary

Questions

Data response A

Data response B

Public ownership, privatisation, regulation and deregulation

How to use this chapter

Introduction

Case study 24.1 the development of the nationalised industries

Reasons for nationalisation

Case study 24.2 problems of nationalised industry control

Case study 24.3 the privatisation process

Methods of privatisation

Case study 24.4 privatisation and the introduction of competition

Vertical disintegration

Local monopolies competing in the capital markets

Competition and new technology

Case study 24.5 the regulation of privatised industries

Case study 24.6 is privatisation a success?

Summary

Labour markets and the distribution of income

The pricing of productive factors

Introduction

Marginal distribution theory

Resources and costs

Production in the long run

Conclusion

Summary

Questions

Table of Contents

Data response A

Data response B

Labour and wages

The determination of the wage rate and level of employment

The supply of labour

Trade unions and wages

National minimum wage

Monopsony in labour markets

Differentials and disequilibriums

Summary

Questions

Data response A

Data response B

An introduction to welfare economics

Introduction

Partial and general equilibrium

The Pareto criterion

Allocative efficiency

Welfare and utility

Efficiency and the free market

Pareto efficiency and perfect competition

The welfare significance of equilibrium in a perfect market

Causes of market failure

Imperfect competition

Externalities

Public goods

Public goods, efficiency and valuation

Conclusion

Summary

Questions

Data response A

Inequality and public policy

Table of Contents

- Structure of the chapter
- The distribution of income and wealth
- Understanding the taxbenefit system
- Understanding the benefit system
- Case study 28.1 what makes a good tax?
- Case study 28.2 the shift to expenditure taxation
- Case study 28.3 direct taxes: a disincentive to work?
- Tax reform
- Case study 28.4 local taxation and autonomy
- Summary

Macroeconomic analysis

Keynesian macroeconomics

- The Keynesian revolution
- Macroeconomics
- The fundamental ideas of Keynes
- Keynesian recession and depression
- The revival of the neo-classical school
- Conclusion
- Summary
- Questions
- Data response A
- Data response B

Changes in aggregate demand: consumption, savings and investment

- Income and consumption
- Determinants of consumption
- Savings
- Determinants of investment
- Conclusion
- Summary
- Questions
- Appendix: the accelerator
- Data response A

Table of Contents

Data response B

The Keynesian

The Keynesian aggregate model

Goods and money

Withdrawals and injections

The hydraulic Keynesian model an overview

The equilibrium of national income

A model of the economy

Conclusion

Summary

Questions

Data response A

The multiplier

The multiplier defined

The operation of the multiplier

The multiplier formula

Equilibrium and the multiplier

Conclusion

Summary

Questions

Data response A

Data response B

Aggregate demand and supply analysis

The aggregate demand and supply curve approach

A neo-classical view

Conclusion

Summary

Questions

Data response A

Data response B

Managing the economy: issues and policies

Table of Contents

Growth and stability

- Economic growth
- Factors influencing growth
- People and growth
- The problems of the UK economy
- Summary
- Questions
- Data response A
- Data response B

Money and prices

- Introduction
- The development of money
- Credit creation
- The functions and attributes of money
- Measuring the money supply
- The quantity equation of money
- The concept of the general price level
- Alternative measures of inflation
- International comparisons
- Financial institutions
- Commercial banks
- Money markets
- The capital market
- Central banking
- Summary
- Questions
- Data response A

Fiscal and monetary policies

- Introduction
- Fiscal policy
- The development of monetary policy
- The stages of monetary policy

Table of Contents

The weapons of monetary policy
Problems of monetary policy
The independence of the Bank of England
Summary
Questions
Data response A
Data response B

Monetary analysis and income analysis

Monetarists and Keynesians
Money and national income
Liquidity preference
Monetarist theory of the demand for money
The determination of aggregate real income
Recession or the natural rate of unemployment?
Conclusion
Summary
Questions
Data response A
Data response B

The control of inflation

The costs of inflation
The Phillips curve
The causes of inflation
The control of inflation
Conclusion
Summary
Questions
Data response A
Data response B

Unemployment and government policy

Employment and unemployment
The costs of unemployment

Table of Contents

Vacancies and unemployment

Types of unemployment

Regional unemployment

The control of unemployment: the supply side view

The control of unemployment: neo-Keynesian views

Conclusion

Summary

Questions

Data response A

Data response B

Advanced policy issues

About this chapter

The philosophy behind neo-classical economics

Demand and marginal utility

Case studies

Case study 40.1 acid rain

Case study 40.2 problems of decision making in the public sector

Cost-benefit analysis

Conclusions

Summary

Appendix: Indifference curve analysis

Applications of indifference curve analysis

Revealed preference theory

Appendix summary

Appendix questions

Data response A

Data response B

The gains of international trade

The theory of comparative advantage

Comparative advantage: a model

Comparative advantage and exchange rates

Extending the theory

Table of Contents

Limitations of comparative advantage

Protectionism considered

Conclusion

Summary

Questions

Data response A

The balance of payments and exchange rates

The pattern of the UK's overseas trade

The balance of payments

The problems of a surplus

Deficit problems

Exchange rates

The exchange rate debate

Fixed exchange rates

The equilibrium exchange rate

The Asian crisis

Recent UK developments

Summary

Questions

Data response A

Data response B

Conflicts between objectives

The lessons of history

Conclusion

Summary

Questions

The EU and wider perspectives

International institutions

Introduction

The International Monetary Fund

The break-up of the Bretton Woods System

Table of Contents

Eurocurrencies

The General Agreement on Tariffs and Trade (GATT) and its successor, the
World Trade Organisation (WTO)

Other international institutions

Summary

Questions

Data response A

Websites

The European Union

Introduction

The economics of integration

Economic and Monetary Union

Regional problems and policy in the EU

Employment and social policy in the EU

EU enlargement

Summary

Questions

Data response A
