Project Management for Information Systems

Pearson

Project Management for Information Systems

Project Management for Information Systems

Table of Contents

Front Cover

Project Management for Information Systems

Contents

Preface

List of reviewers

Acknowledgements

Part One The Business Context

Types of information systems projects

Introduction

Software development projects

Package implementation projects

System enhancement projects

Consultancy and business analysis assignments

Systems migration projects

Infrastructure projects

Outsourcing (and in-sourcing) projects

Disaster recovery projects

Smaller IS projects

Summary

Questions

Case study

Further reading

Business strategy and information systems

Introduction

What is strategy all about?

Developing a strategy

Table of Contents

Competition and strategy

Strategy and culture

Summary

Questions

Case study

Further reading

The business case

Introduction

Content and format of a business case

Investment appraisal

Presenting the business case

Benefits realization and management

Summary

Questions

Case study

Further reading

The organizational framework

Introduction

Introduction to organization structures

Project roles and responsibilities

Organizing the roles

Programme and portfolio management

PRINCE2 organization structure

Summary

Questions

Case study

Further reading

The programme and project support office

Introduction

Evolution of the PPSO function

Functions of a PPSO

Pre-initiation stage of project

Table of Contents

Project initiation

Main delivery stages of the project

Post-project

Ongoing PPSO activities

Benefits of a PPSO

Summary

Questions

Case study

Further reading

Development lifecycles and approaches

Introduction

Development lifecycles

Approaches to systems development

Summary

Questions

Case study

Further reading

The profile of a project

Introduction

The process model

Pre-project work

Project start-up

Development stage

Completion stage

Operational stage

Post-project review

Summary

Questions

Case study

Further reading

Part Two Project Execution

Table of Contents

Project planning: understanding the work

- Introduction
- Understanding the requirement
- Breaking down the work
- Product descriptions and work packages
- Understanding dependencies
- Bar charts
- Planning for quality
- Tolerances
- Using planning tools
- Summary
- Questions
- Case study
- Further reading

Project planning: estimating

- Estimating for IS projects
- Estimating in engineering disciplines
- Estimating methods compared
- Estimating for supporting activities
- Human factors affecting estimating
- Practical experiences with estimating
- Summary
- Questions
- Case study
- Further reading

Project planning: scheduling and resourcing

- Introduction
- Scheduling
- Developing resource plans
- Contingency
- Documenting the plan
- PRINCE2 plans

Table of Contents

Budgets

Summary

Questions

Case study

Further reading

Monitoring progress

Introduction

Monitoring effort

Monitoring other costs

Monitoring quality

Milestone slip chart

Earned value analysis

Summary

Questions

Case study

Further reading

Exercising control

Introduction

Evaluating the current situation

Possible corrective actions

Implementing corrective actions

Change control

Change control and configuration management

Exercising control in PRINCE2

Summary

Questions

Case study

Further reading

Reporting progress

Introduction

Recipients of progress reports

Frequency of reporting

Table of Contents

Report content and format

Reporting in PRINCE2

Summary

Questions

Case study

Further reading

Part Three Delivering Success

Managing quality

Introduction

Quality concepts

Total quality management

Quality management and the quality plan

Quality control methods

The cost of poor quality

Inspection versus testing

The management of software testing

Metrics and statistical quality control

Supporting activities

Configuration management

Managing quality with PRINCE2

Summary

Questions

Case study

Further reading

Managing risk

Introduction

Outline of the risk management process

Risk identification

Risk assessment

Risk actions

Risk management planning and control

The risk register

Table of Contents

- Risk ownership
- Other risk concepts
- Risk management in PRINCE2
- Summary
- Questions
- Case study
- Further reading

Value engineering and value management

- Introduction
- An approach to value management in projects
- Summary
- Questions
- Further reading

Selling the project

- Introduction
- Buying and buyers
- The selling process
- Negotiation
- Summary
- Questions
- Case study
- Further reading

Managing stakeholders

- Introduction
- Stakeholders
- Who is the customer?
- Managing expectations
- Managing changes
- Managing conflict
- Stakeholder management skills
- Summary
- Questions

Table of Contents

Case study

Further reading

Managing suppliers

Introduction

Setting up the contract

Monitoring supplier performance

Quality control and subcontractors

Summary

Questions

Case study

Further reading

Managing change

Introduction

Organizational change

Organizational culture

The project manager and change

Achieving success

Summary

Questions

Further reading

Part Four The Human Dimension

Leadership and performance

Introduction

Motivation

Leadership

A leadership process

Managing performance

Setting objectives

Reviewing performance

Reprimands

Performance improvement through coaching

Table of Contents

Summary

Questions

Case study leadership

Case study performance management

Further reading

Managing the team

Introduction

The lifecycle of teams

Belbin on teams

International and virtual teams

The effective team

Making it possible

Creating the working environment

Handling conflict

Managing stress

Summary

Questions

Case study

Further reading

The project manager

Introduction

The vision

An outside perspective

A developmental approach

Using psychometric assessment

Ethical considerations

Summary

Questions

Further reading

Developing your career

Introduction

Project Management Institute (www.pmi.org.uk)

Table of Contents

Association for Project Management (www.apm.org.uk)

British Computer Society (www.bcs.org.uk)

APM Group (www.apmgroup.co.uk)

Australian Institute of Project Management (www.aipm.com.au)

Summary

Bodies of knowledge and standards

Introduction

Bodies of knowledge

Standards
