Introduction

- Organization of this book

- Microsoft certifications

- Acknowledgments

- Free ebooks from Microsoft Press

- Microsoft Virtual Academy

- Quick access to online references

- Errata, updates, & book support

- We want to hear from you

- Stay in touch

- Preparing for the exam

Chapter 1 Manage data with Transact-SQL

- Skill 1.1: Create Transact-SQL SELECT queries

  - Understanding the foundations of T-SQL

  - Understanding logical query processing

  - Getting started with the SELECT statement

  - Filtering data with predicates

# **Table of Contents**

Sorting data

Filtering data with TOP and OFFSET-FETCH

Combining sets with set operators

## **Skill 1.2: Query multiple tables by using joins**

Cross joins

Inner joins

Outer joins

Queries with composite joins and NULLs in join columns

Multi-join queries

## **Skill 1.3: Implement functions and aggregate data**

Type conversion functions

Date and time functions

Character functions

CASE expressions and related functions

System functions

Arithmetic operators and aggregate functions

Search arguments

Function determinism

## **Skill 1.4: Modify data**

Inserting data

Updating data

Deleting data

Merging data

Using the OUTPUT option

Impact of structural changes on data

## **Chapter summary**

Thought experiment

Thought experiment answer

# **Table of Contents**

## **Chapter 2 Query data with advanced Transact-SQL components**

### **Skill 2.1: Query data by using subqueries and APPLY**

Subqueries

The APPLY operator

### **Skill 2.2: Query data by using table expressions**

Table expressions, described

Table expressions or temporary tables?

Derived tables

Common table expressions

Views and inline table-valued functions

### **Skill 2.3: Group and pivot data by using queries**

Writing grouped queries

Pivoting and Unpivoting Data

Using Window Functions

### **Skill 2.4: Query temporal data and non-relational data**

System-versioned temporal tables

Query and output XML data

Query and output JSON data

### **Chapter summary**

### **Thought experiment**

### **Thought experiment answer**

## **Chapter 3 Program databases by using Transact-SQL**

### **Skill 3.1: Create database programmability objects by using Transact-SQL**

Views

User-defined functions

Stored procedures

### **Skill 3.2: Implement error handling and transactions**

Understanding transactions

# **Table of Contents**

Error handling with TRY-CATCH

Skill 3.3: Implement data types and NULLs

Working with data types

Handling NULLs

Chapter summary

Thought experiment

Thought experiment answer
