

IPsec Virtual Private Network Fundamentals

An introduction to VPNs

IPsec Virtual Private Network Fundamentals

James Henry Carmouche, CCIE No. 6085

Cisco Press

800 East 96th Street
Indianapolis, Indiana 46240 USA

IPSec Virtual Private Network Fundamentals

Table of Contents

Contents

Introduction

Part I: Introductory Concepts and Configuration/Troubleshooting

Chapter 1 Introduction to VPN Technologies

- VPN Overview of Common Terms

- Characteristics of an Effective VPN

- VPN Technologies

- Common VPN Deployments

- Business Drivers for VPNs

- IPsec VPNs and the Cisco Security Framework

- Summary

Chapter 2 IPsec Fundamentals

- Overview of Cryptographic Components

- Public Key Encryption Methods

- The IP Security Protocol (IPsec)

- IKE and ISAKMP

- Summary

Chapter 3 Basic IPsec VPN Topologies and Configurations

- Site-to-Site IPsec VPN Deployments

- Site-to-Site IPsec VPN Deployments and GRE (IPsec+GRE)

- Hub-and-Spoke IPsec VPN Deployments

- Remote Access VPN Deployments

- Summary

Chapter 4 Common IPsec VPN Issues

- IPsec Diagnostic Tools within Cisco IOS

Table of Contents

Common Configuration Issues with IPsec VPNs
Architectural and Design Issues with IPsec VPNs
Summary

Part II: Designing VPN Architectures

Chapter 5 Designing for High Availability

Network and Path Redundancy
IPSec Tunnel Termination Redundancy
Managing Peer and Path Availability
Managing Path Symmetry
Load Balancing, Load Sharing, and High Availability
Summary

Chapter 6 Solutions for Local Site-to-Site High Availability

Using Multiple Crypto Interfaces for High Availability
Stateless IPsec VPN High-Availability Alternatives
Stateful IPsec VPN High-Availability Alternatives
Summary

Chapter 7 Solutions for Geographic Site-to-Site High Availability

Geographic IPsec VPN HA with Reverse Route Injection and Multiple IPsec Peers
Geographic IPsec VPN High Availability with IPsec+GRE and Encrypted Routing Protocols
Dynamic Multipoint Virtual Private Networks
Summary

Chapter 8 Handling Vendor Interoperability with High Availability

Vendor Interoperability Impact on Peer Availability
Vendor Interoperability Impact on Path Availability
Vendor Interoperability Design Considerations and Options
Summary

Chapter 9 Solutions for Remote-Access VPN High Availability

Table of Contents

IPsec RAVPN Concentrator High Availability Using Virtual Interfaces for
Tunnel Termination

IPsec RAVPN Concentrator HA Using the VCA Protocol

IPsec RAVPN Geographic HA Design Options

Summary

Chapter 10 Further Architectural Options for IPsec

IPsec VPN Termination On-a-Stick

In-Path Versus Out-of-Path Encryption with IPsec

Separate Termination of IPsec and GRE (GRE-Offload)

Summary

Part III: Advanced Topics

Chapter 11 Public Key Infrastructure and IPsec VPNs

PKI Background

PKI Components

Life of a Public Key Certificate

PKI and the IPsec Protocol SuiteWhere PKI Fits into the IPsec model

OCSP and CRL Scalability

Case Studies and Sample Configurations

Summary

Chapter 12 Solutions for Handling Dynamically Addressed Peers

Dynamic Crypto Maps

Tunnel Endpoint Discovery

Case StudyUsing Dynamic Addressing with Low-Maintenance Small Home Office
Deployments

Summary

Appendix A: Resources

Books

RFCs

Web and Other Resources
