

# IP Addressing Fundamentals

The reader-friendly explanation of how the  
IP address space works and how it is used

# IP Addressing Fundamentals

**Mark A. Sportack**

**Cisco Press**

Cisco Press  
201 West 103rd Street  
Indianapolis, IN 46290 USA

# IP Addressing Fundamentals

## Table of Contents

### Table of Contents

#### Introduction

#### Part I: Introduction to IP Addressing

##### Chapter 1 Developing the Internets Technologies

- The Internets Caretakers

- The Internet Standards Process

- The Benefits of Openness

- Summary

##### Chapter 2 Classical IP: The Way It Was

- Evolution of the Address Space

- The Address Space Hierarchy

- Summary

##### Chapter 3 Fixed-Length Subnet Masks

- Introduction to Subnetting

- Forming Subnets from 24-Bit Network Addresses

- Sources of Inefficiencies with FLSM

- Summary

##### Chapter 4 Variable-Length Subnet Masks

- Variable-Length Subnetting in the RFCs

- The Inefficiencies of FLSM

- A Practical Application

- Summary

#### Part II: The Evolution of IPv4

# **Table of Contents**

## **Chapter 5 The Date of Doom**

Responding to the Crisis

Interim Solutions

Summary

## **Chapter 6 Classless Interdomain Routing (CIDR)**

CIDR: An Historic Review

Symmetry of CIDR Notation

Supernetting

Summary

## **Chapter 7 Private Addresses and NAT**

Private Address Spaces

NAT

Implementation Topologies

Problems with NAT

Summary

## **Part III: Advanced IP Topics**

### **Chapter 8 Internet Names**

Introduction to Internet Names

DNS: The Hierarchical Approach

Nonstandard Internet Names

Summary

### **Chapter 9 IP Multicasting**

The Concept of Multicasting

IPv4 Multicasting Mechanisms

Summary

## **Part IV: Strategies for Network Stability, Scalability, and Performance**

### **Chapter 10 Networking with IP**

# **Table of Contents**

Dissecting a Typical Communications Session  
Domain Name System  
Translating IP Addresses into MAC Addresses  
Summary

## **Chapter 11 Internetworking with IP**

The Mechanics of Routing  
Routing and the Internet  
Summary

## **Chapter 12 Network Stability**

The Problem with Open Networking  
RFC 2267, Source Address Assurance  
Address Lending for Network Stability  
Summary

## **Chapter 13 Planning and Managing an Address Space**

The Challenge of Managing an Address Space  
Address Management Issues for an Enterprise WAN  
ISP Address Management Issues  
Address Management Issues for an Internet Hosting Center  
Summary

## **Chapter 14 Address Management Tactics**

The Challenge of Managing an Address Space  
Sequential Assignment  
Sequential Assignment with Gaps  
Predefining with Symmetrical Gaps  
Balkanizing an Address Space  
Summary

## **Part V: The Future of the Internet Protocol**

### **Chapter 15 IPv6: The Future of IP Addressing**

The Need for More

# **Table of Contents**

Overview of IPv6

Address Types

More Migration Tools

What Are We Waiting For?

Summary
