Cisco Systems

IP COMMUNICATIONS

Troubleshooting Cisco IP Telephony

Reveals the methodology you need to resolve complex problems in an IP telephony network

Paul Giralt, CCIE® No. 4793
Addis Hallmark
Anne Smith

ciscopress.com

Active Directory domain name problems 841
Active Directory integration troubleshooting and overview 837
Active Directory schema modifications 840
Active Directory—users added in Active Directory don't show up in CallManager Administration 843
Adding a user fails 824
Alarms (red and yellow) on a digital interface 208
"Already in conference" message 597
Attendant Console client configuration 781
Attendant Console—fast busy on calls to a pilot point 782
Attendant Console—line states won't update 782
Attendant Console—lines are disabled 782
Attendant Console—login failed 782
Attendant Console—longest idle algorithm is not working properly 782
Attendant Console—new user doesn't display 782
Attendant Console server configuration 780
Attendant Console—some line states show Unknown status 782
Attendant Console troubleshooting methodology 782
Attendant Console—wrong directory list displays 782
Audio problems 384, 389, 396, 400, 402, 405, 410
Audio Translator problems 617
Automated alternate routing (AAR) troubleshooting 637
Busy signal not heard on an IP phone 310
Calling name display problems 270
Calling search spaces, overview 469
CallManager Serviceability 82
CallManager wildcard summary 460
Call preservation, overview 551
Call routing problems 515
CCM traces—how to read 42
CCM traces—how to read Skinny messages 148
CDRs are not being written properly 813
CDRs are not generated by Subscriber 810
Choppy audio 396
"CM Down, Features Disabled" message 158
"CM Fallback Service Operating" message 707
CMI—reading traces 674
Codec selection between devices 570
Conference bridge—out of resources 578
Conference Connection doesn't work 789
Corporate directory—add or delete users fails in CallManager Administration 843
Corporate directory—Error: "The phone administrator is currently not allowed to add or delete users" 843
CRA Administration page does not load 738
CRA Application Engine problems 745
CRA directory configuration troubleshooting 741
CRA trace files (MIVR) 748
Customer Directory Configuration Plugin troubleshooting 839, 842
Database Layer Monitor is not running properly 812
Database replication problems 796, 804, 807
D-channel won't establish on PRI 210
DC Directory—reconfiguring in CallManager 3.3 828, 835
DC Directory—reconfiguring in pre-3.3 CallManager 830, 835
Directory access troubleshooting 823
Directory troubleshooting 824
Delayed audio 384
Delayed routing 466
Dial peer matching in IOS, overview 175
Dick Tracy 101
Digit discard instructions (DDIs), overview 486
directories button doesn't work 160
Disconnected calls with cause code 0xE6, "Recovery on timer expiry." 271
DPA 7610/7630—MWI problems 702
Dropped calls 157
Dropped packets 397
DTMF relay, overview 303
E1 interface troubleshooting 208
Echo problems 410, 418, 421, 428
"Exceeds maximum parties" message 597
Extension mobility—common error messages 765, 777
Extension mobility problems on CallManager release 3.1 or 3.2 756
Extension mobility problems on CallManager release 3.3 773
Extension mobility troubleshooting methodology for CallManager release 3.1 or 3.2 765
Failover—phone behavior and causes 155, 158
Fax machine troubleshooting methodology 446, 447, 449
Fax passthrough configuration 441
Fax passthrough, overview 437
Fax relay debugs, enabling 455
Fax relay, overview 444
Fax takes twice as long to complete 451
FXO port will not disconnect a completed call 205
Garbled audio 396
Gatekeeper call admission control 638, 640
H.323 call flow (H.225 and H.245) 283, 284, 287
Hold and resume problems 522
Hold doesn't play music 611
Intercluster trunk troubleshooting 311
IOS gateway—call routing and dial peer debugs 196
IOS gateway debugs 185
IOS gateway—debugs and show commands 184
IOS gateway—diagnosing the state of ports 187
IOS gateway—TDM interfaces 187
IOS gateway won't register with CallManager (MGCP) 240
iPlanet integration troubleshooting 844
ISDN cause codes (Q.850) 262
ISDN messages, overview 258
ISDN timers, overview 271
Jitter 389, 400

Troubleshooting Cisco IP Telephony

Table of Contents

Contents
Foreword
Introduction
Chapter 1 Troubleshooting Methodology and Approach
- Developing a Troubleshooting Methodology or Approach
  - Production Versus Nonproduction Outages
  - Step 1: Gathering Data About the Problem
  - Step 2: Analyzing the Data Collected About the Problem
- Case Study: Resolving a Problem Using Proper Troubleshooting Methodology
  - Gathering the Data
  - Analyzing the Data
  - Conclusions
- Summary

Chapter 2 IP Telephony Architecture Overview
- Network Infrastructure
- IP Telephony Infrastructure
  - Call Processing
  - Cisco AVVID IP Telephony Infrastructure
  - Clients
  - Voice Gateways
- Cisco AVVID IP Telephony Applications
- Summary

Pearson

Table of Contents

Chapter 3 Understanding the Troubleshooting Tools

Time Synchronization

Configuring Automatic Time Synchronization on CallManager Servers

Synchronizing Time Manually on CallManager Servers

Synchronizing Time on Cisco IOS Devices

Synchronizing Time on CatOS Devices

Reading CCM (or SDI) Traces

Setting the Appropriate Trace Level and Flags

Reading CCM Traces

A Sample CCM Trace for a Call Between Two IP Phones

Tracing a Call Through an MGCP T1 PRI Gateway

Reading SDL Traces

SDL Overview

Enabling SDL Trace and Setting the Appropriate SDL Trace Level

Microsoft Performance (PerfMon)

Comparing PerfMon and the Real-time Monitoring Tool (RTMT)

Using PerfMon to View Real-Time Statistics

Using Counter Logs

Using Alerts

CCEmail

Alerting Methods During Production and Non-production Hours

Acquiring CCEmail

CallManager Serviceability

Alarms

Tracing

Service Activation

Control Center

Real-Time Monitoring Tool (RTMT)

Call Detail Records (CDR) and the CDR Analysis and Reporting

Table of Contents

(CAR) Tool

CDR Time Converter

Acquiring the CDR Time Converter

Event Viewer

Q.931 Translator and Enhanced Q.931 Translator

Enhanced Q.931 Translator 98

Acquiring Enhanced Q.931 Translator

Dick Tracy

Using the Dick Tracy Tool

Using the CLI Tracy/Embedded Tracy Tool

Acquiring Dick Tracy

Sniffer Traces

Voice Codec Bandwidth Calculator

Bug Toolkit (Formerly Bug Navigator)

Remote Access Tools

Terminal Services

Virtual Network Computing (VNC)

Websites and Further Reading

Best Practices

VNC Best Practices

Summary

Chapter 4 Skinny Client Registration

Troubleshooting Inline Power

Troubleshooting Network Connectivity and Skinny Registration

Verifying VLAN configuration

Verifying IP Addressing Information

Verifying TFTP Configuration File Download

Understanding Skinny Registration

Table of Contents

Troubleshooting Skinny Registration

Additional Tools for Troubleshooting Skinny Client Registration Problems

Checking IP Phone Status Messages

Checking Registration with the Real-Time Monitoring Tool

Best Practices

Summary

Chapter 5 IP Phones

Understanding IP Phone Behavior

Understanding the Skinny Protocol

Understanding Failover and Failback

Understanding the Difference Between Restart and Reset

Troubleshooting IP Phone Problems

Dropped Calls

"CM Down, Features Disabled"

Reasons for Failover

Directory and Service Problems

79xx Series IP Phone 3-port Switch Operation

Best Practices

Check Your Firmware

Press the Help (i or ?) Button Twice During Active Calls

Use a Custom Phone Service That Tracks Voice Quality Statistics

Check the IP Phone Configuration Via Web Browser

Summary

Chapter 6 Voice Gateways

Cisco IOS Voice Gateways

Cisco VG200

Cisco 2600 Series Routers

Cisco 3600 Series Routers

Pearson

Table of Contents

- Cisco 3700 Series Routers
- Cisco Catalyst 4224
- Cisco Catalyst 4000 Access Gateway Module (AGM)
- Cisco WS-SVC-CMM Communications Media Module (CMM)
- Other Cisco IOS Gateways

Understanding Dial Peer Matching in Cisco IOS Software

Understanding Cisco IOS Debugs and show Commands

- Correctly Setting the Timestamps
- Enabling Cisco IOS Software Debugs

Troubleshooting TDM Interfaces on Cisco IOS Gateways

- Useful show Commands for Troubleshooting TDM Interfaces
- Using debug Commands to Troubleshoot TDM Interfaces

Understanding the FXO Disconnect Problem

Troubleshooting Digital Interfaces

- Checking Physical Layer Connectivity on Digital Interfaces
- Troubleshooting ISDN PRI Signaling
- Troubleshooting T1 CAS

Understanding MGCP

- MGCP Endpoint Identifiers
- MGCP Commands
- MGCP Parameter Lines
- MGCP Packages
- MGCP Response Headers and Response Codes

Cisco IOS MGCP Gateways

- MGCP FXS/FXO
- Cisco IOS MGCP PRI
- Cisco IOS MGCP T1 CAS

Cisco IOS Gateways Using the H.323 Protocol

Pearson

Table of Contents

H.225 Signaling

H.245 Signaling

Additional H.323 Debugs in Cisco IOS Software

Troubleshooting Problems with Ringback and Other Progress Tones

No Ringback on an IP Phone When Calling the PSTN

No Ringback on a PSTN Phone When Calling an IP Phone

No Ringback When Transferring a Call

The IP Phone User Does Not Hear In-band Messages When a Call Is Disconnected

Intercluster Trunks

Troubleshooting the WS-X6608 and WS-X6624 Voice Gateways

Recognizing and Powering the Module

Troubleshooting DHCP, TFTP, and Registration Problems

Catalyst WS-X6608 T1/E1 Digital Gateway Configuration

Troubleshooting Configuration Issues

Advanced Troubleshooting for D-channel Problems

Catalyst WS-X6624 FXS Analog Gateway Configuration

Best Practices

Summary

Chapter 7 Voice Quality

Fixed and Variable Delays

Fixed Delay Sources

Variable Delay Sources

The Effects of Delay on Signaling

Analyzing and Troubleshooting Choppy and Garbled Audio

Packet Drops

Queuing Problems

The Effect of VAD on Voice Quality

Troubleshooting Problems with One-way or No-way Audio

Pearson

Table of Contents

Verifying IP Connectivity

One-way Audio on Cisco IOS Software Gateways

NAT, PAT, and Firewalls

Troubleshooting Echo Problems

Sources of Echo

Talker Versus Listener Echo

What Makes Echo a Problem

How an Echo Canceller Works

Eliminating Echo

Best Practices

Summary

Chapter 8 Fax Machines and Modems

Understanding Fax Machine Operation

Basic Fax Machine Operation

Understanding Fax/Modem Passthrough Versus Fax Relay

Fax/Modem Passthrough

Fax Relay Basics

The Effect of Packet Loss and Jitter on Fax Machines and Modems

First Steps in Troubleshooting Fax and Modem Problems

Checking for Physical Layer Problems on Digital Circuits

Isolating and Troubleshooting Fax Problems

Adjusting the Fax Relay Data Rate

Disabling Error Correction Mode

Changing the Nonstandard Facilities Field

Changing the Fax Protocol

Checking the fax interface-type Command

Enabling Fax Relay Debugs

Best Practices

Pearson

Table of Contents

Summary

Chapter 9 Call Routing

Understanding Closest-match Routing

Common Problems Associated with Closest-match Routing

Understanding Calling Search Spaces and Partitions

Calling Search Space/Partition Rules

Event-specific Calling Search Spaces

Call Forwarding Calling Search Spaces

Understanding and Troubleshooting Transformations and Masks

Digit Discard Instructions (DDIs)

Understanding the Concept of Masks

Transformation Rules

Service Parameter-related Transformations

Understanding and Troubleshooting Translation Patterns

Understanding Route Filters

Digit Transformation Troubleshooting

Call Routing Troubleshooting

Reading CCM Traces for Call Routing Information

Troubleshooting Hold, Transfer, Park, and Call Pickup

Call Hold and Resume

Call Transfer

Call Park

Call Pickup

Getting the Dialing Forest Traces

Best Practices

Toll Fraud Prevention

Summary

Chapter 10 Call Preservation

Table of Contents

- Understanding Call Preservation
  - Survivable Endpoints
  - Nonsurvivable Endpoints
  - Media Processing Resources
- Troubleshooting Call Preservation Issues
- Best Practices
- Summary

Chapter 11 Conference Bridges, Transcoders, and Media Termination Points

- Media Resource Groups (MRGs) and Media Resource Group Lists (MRGLs)
  - MRGL Selection
- Understanding Codec Selection
- Transcoder Resources
  - Regions and the Regions Codec Matrix
  - Out-of-resource Conditions
  - Use of Transcoders in Conjunction with Other Media Resources
- Conference Bridge Devices
  - Types of Conference Bridges
  - Troubleshooting "No Conference Bridge Available"
  - Troubleshooting Conference Failures
  - Other Conferencing Error Messages
- Best Practices
- Summary

Chapter 12 Music on Hold

- Understanding MOH
- Troubleshooting Data Points

Table of Contents

Performance Counters

CCM Trace Files

Troubleshooting MOH

Resolving Problems Related to Multicast and Unicast

Determining Why Tone on Hold Is Playing

Troubleshooting the Audio Translator

Troubleshooting the Live Audio Source

Best Practices

Summary

Chapter 13 Call Admission Control

Locations-based CAC

Setting LocationsTraceDetailsFlag and CDCC Values

The Role of Regions in CAC

Locations-based CAC in Action

Locations Reservations for Media Resources

Finding Bandwidth Leaks

Locations and Call Preservation Interaction

Troubleshooting Automated Alternate Routing

Gatekeeper Call Admission Control

Checking Gatekeeper Configuration

Verifying Gatekeeper Configuration on CallManager

CallManager Registration with Gatekeeper

Call Setup with Gatekeeper

Best Practices

Summary

Chapter 14 Voice Mail

Cisco Unity

CallManager Integration

Pearson

Table of Contents

Message Waiting Indicator (MWI)

Dual-Tone Multifrequency (DTMF) Relay Problems

Additional Unity Troubleshooting

More Troubleshooting Resources for Unity

SMDI Integration

- Understanding SMDI Messages
- Cisco Messaging Interface
- Message Waiting Indicator Problems
- Cisco VG248 SMDI Integration

Octel Voice Mail Digital Integration Via a DPA Voice Mail Gateway

- Verify Cabling
- Check Port Status
- Troubleshooting DPA MWI Problems
- Using the DPA Event Log

Best Practices

Summary

Chapter 15 Survivable Remote Site Telephony (SRST)

SRST Operation

- SRST Configuration
- IP Phone Registration
- SRST Dial Plan
- Debugging Call Control in SRST Mode
- Problems with Transferring Calls in SRST Mode
- IP Phones Stuck in SRST Mode
- Voice Mail and Forwarding Features in SRST Mode
- DHCP Considerations When Using SRST
- Best Practices
- Summary

Pearson

Table of Contents

Chapter 16 Applications

- Customer Response Applications (CRA)
  - Checking TSP or JTAPI Plugin Versions
  - IP IVR and IP AA
  - Extension Mobility for CallManager 3.1 and 3.2
  - Extension Mobility for CallManager 3.3
  - Troubleshooting Extension Mobility on CallManager 3.3
- Cisco CallManager Attendant Console
  - Understanding the Server Components
  - Understanding the Attendant Console Client
  - Troubleshooting Attendant Console
- Cisco Personal Assistant
  - Call Routing Problems and Personal Assistant
  - Personal Assistant and Message Waiting Indicator Issues
- Cisco IP SoftPhone
  - Line Number Displays, But No Dial Tone
  - Echo Problems with Cisco IP SoftPhone
  - One-way Audio and Using Cisco IP SoftPhone over VPN
  - Cisco IP SoftPhone Has No Lines
- Cisco IP Phone Services
- Cisco IP Videoconferencing (IP/VC)
- Cisco Conference Connection
  - Ensure the Necessary Services Are Started
  - Using Event Viewer with Conference Connection
- Cisco Emergency Responder (ER)
- Summary

Chapter 17 SQL Database Replication

- Understanding the Publisher-Subscriber Model

Pearson

Table of Contents

Troubleshooting the Publisher-Subscriber Relationship

The Role of Name Resolution and Passwords in Replication

Microsoft SQL Server Enterprise Manager

Correcting Replication Errors

Re-establishing a Broken SQL Replication Subscription

Reinitializing a Subscription

CDR Replication Issues

Subscriber Is Not Configured to Generate CDRs

Database Layer Monitor Is Not Running Properly

Additional Problems with Writing CDRs

Best Practices

Summary

Chapter 18 LDAP Integration and Replication

Directory Integration Versus Directory Access

Providing Endpoints with Corporate Directory Access

Using the CallManager Embedded Directory

Troubleshooting the CallManager Embedded Directory

Understanding and Troubleshooting Active Directory Integration

Troubleshooting Common Problems with Installing the Customer Directory Configuration Plugin

Understanding and Troubleshooting Netscape iPlanet Integration

Best Practices
