

# Definitive MPLS Network Designs

Field-proven MPLS designs covering MPLS VPNs, pseudowire, QoS, traffic engineering, IPv6, network recovery, and multicast

# Definitive MPLS Network Designs

**Jim Guichard**

**François Le Faucheur**

**Jean-Philippe Vasseur**

Indianapolis, IN 46240 USA

# Definitive MPLS Network Designs

## Table of Contents

Contents

Foreword

Introduction

Chapter 1 Technology Primer: Layer 3 VPN, Multicast  
VPNs, IPv6, and Pseudowire

MPLS VPN Services in MPLS/IP Networks

Layer 3 MPLS VPN Network Components

Separation of Routing State at PE Routers

Customer-to-Service Provider Routing Exchange

Label Allocation at the PE Router

Advertisement of VPNv4 Routes Across the IP/MPLS Backbone

Import of Remote Routing Information into VRFs

Forwarding of Layer 3 MPLS VPN Packets

Remote Access to the Layer 3 MPLS VPN Service

Dial-in Access Via L2TP VPDN

Dial-in Access Via Direct ISDN

DSL Access Using PPPoA or PPPoE and VPDN (L2TP)

Carrier Carrier Architecture

Packet Forwarding with Carrier Carrier

Layer 3 MPLS VPN Services Across Autonomous System Boundaries

Inter-AS Back-to-Back VRFs (Option A)

Inter-AS VPNv4 Exchange (Option B)

Inter-AS VPNv4 Exchange Between Route Reflectors (Option C)

# **Table of Contents**

## **Multicast VPNs**

- Source Distribution Multicast Trees
- IP Multicast Shared Trees
- Protocol-Independent Multicast (PIM)
- Source-Specific Multicast (SSM)
- Multicast Support Within a Layer 3 MPLS VPN
- Multicast Domains
- mVPN PIM Adjacencies
- Multicast Forwarding with mVPN

## **IPv6 Over MPLS Networks**

- Overview of IPv6

## **Layer 2 Services and Pseudowires**

- Pseudowire Network Components
- Pseudowire Creation and Signaling
- Pseudowire Encapsulation
- Pseudowire Packet Flow

## **Chapter 2 Technology Primer: Quality of Service, Traffic Engineering, and Network Recovery**

### **Quality of Service in MPLS Networks**

- Traffic Requirements and Service Level Agreements
- QoS Mechanisms
- The Fundamental QoS Versus Utilization Curve
- The IETF DiffServ Model and Mechanisms
- MPLS Support of DiffServ
- Combining Tools to Support SLA

### **Traffic Engineering**

- MPLS Traffic Engineering Components

# **Table of Contents**

Hierarchy of Attributes (Set of Ordered Path Option)

TE LSP Path Computation

MPLS TE IGP Routing Extensions

Signaling of a Traffic Engineering LSP

Routing onto a Traffic Engineering LSP

Solving the Fish Problem

TE LSP Deployment Scenarios

Reoptimizing a Traffic Engineering LSP

MPLS Traffic Engineering and Load Balancing

MPLS Traffic Engineering Forwarding Adjacency

Automatic Meshing of a Mesh of TE LSPs

## **DiffServ-Aware MPLS Traffic Engineering**

Bandwidth Constraints Model

Extensions to the Traffic Engineering LSP Attribute

Extensions to TE LSP Path Computation

Extensions to Traffic Engineering IGP Routing

Extensions to TE LSP Signaling

Routing onto DiffServ-Aware TE LSPs

Example of DS-TE Deployment

## **MPLS Traffic Engineering in the Context of Multiarea and Multi-AS**

### **Core Network Availability**

Protection Versus Restoration

Local Versus Global Recovery

Network Recovery with IP Routing

Use of Dynamic Timers for LSA Origination and SPF Triggering

Network Recovery with MPLS Traffic Engineering

## **Chapter 3 Interexchange Carrier Design Study**

### **USComs Network Environment**

# **Table of Contents**

USComs Network Design Objectives

Routing and Backbone Label Forwarding Design

Separation of Internet and Layer 3 MPLS VPN Services

Internet Service Route Reflection Deployment

Layer 3 MPLS VPN Service Design Overview

PE Router Basic Engineering Guidelines

PE Router Control-Plane Requirements

VPNv4 Route Reflector Deployment Specifics

PE-CE Routing Protocol Design

Quality of Service Design

Traffic Engineering Within the USCom Network

Network Recovery Design

Design Lessons to Be Taken from USCom

## **Chapter 4 National Telco Design Study**

Telecom Kingland Network Environment

Telecom Kingland POP Structure

Telecom Kingland Design Objectives

Routing and Backbone Label-Forwarding Design

Shared-Edge Internet and Layer 3 MPLS VPN Services

Internet Service: Route Reflection Deployment

Layer 3 MPLS VPN Service: Design Overview

Multiservice PE Router Basic Engineering Guidelines

Customer VRF Naming Convention

RT/RD Allocation Schemes

Network Management VPN

Load-Balancing Support

mPE Router Control-Plane Requirements

# **Table of Contents**

PE-CE Routing Protocol Design

## **Carriers Carrier Service**

Load-Balancing Support with Carriers Carrier

Large Carriers Carrier Customer Attachment Example

## **Remote Access to the Layer 3 MPLS VPN Service**

Dial-In Access Via L2TP VPDN

Dial-In Access Via Direct ISDN

DSL Access Using PPPoE or PPPoA and VPDN (L2TP)

## **mVPN Service Application**

Multicast Address Allocation

Multicast Routing Protocol Support

Rendezvous Point and BSR Design for PIM-SM

Use of Data-MDTs in the mVPN Design

Restricting Multicast Routing State at mPE Routers

## **Quality of Service Design**

Layer 3 MPLS VPN and Internet SLA

QoS Design in the Core Network

QoS Design on the Network Edge for Layer 3 MPLS VPN and Internet

QoS Design on the Network Edge for Voice Trunking

QoS Design on the Network Edge for Layer 3 MPLS VPN CsC

SLA Monitoring and Reporting

## **MPLS Traffic Engineering Design**

Setting the Maximum Reservable Bandwidth on Each MPC Link

TE LSPs Bandwidth

Path Computation

TE LSPs Between PE-PSTN1 Routers

TE LSPs Between PE-PSTN1 and PE-PSTN2 Routers or Between PE-PSTN2 Routers

# **Table of Contents**

- Reoptimization of TE LSPs
- MPLS Traffic Engineering Simulation
- TE Scaling Aspects
- Use of Refresh Reduction
- Provisioning the Mesh of TE LSPs
- Monitoring
- Last Resort Unconstrained Option

## **Network Recovery Design**

- Network Recovery Design for the Internet and Layer 3 MPLS VPN Traffic
- Network Recovery Design for the PSTN Traffic
- IPv6 Internet Access Service Design
- Design Lessons to Be Taken from Telecom Kingland

## **Chapter 5 Global Service Provider Design Study**

### **Globenet Network Environment**

- Globenet Service Portfolio
- Globenet POP Network Structure
- Globenet Worldwide Network Architecture
- Intercontinental Connectivity
- Globenet Routing Architecture
- Interoperator Partnerships
- Link Types and Protection Details
- Design Objectives for the Globenet Network

### **Layer 3 MPLS VPN Service Design**

- Shared-Edge Internet and MPLS VPN Services
- Connectivity Between Globenet Regions
- Connectivity with Regional Service Providers

### **Providing Internet Services to MPLS VPN Customers**

- Internet Via the Global or VRF Routing Table

# **Table of Contents**

Internet Access Following the Default Route

Full Internet Access Via the PE-CE Access Link

Internet Access Via Globenet NAT/Firewall Services

## **mVPN Service Design**

MP-BGP Support of Inter-AS mVPN

Establishing mVPN MDT Groups Between Globenet Regions

Inter-AS mVPN System Flow

## **MPLS VPN Security and Scalability**

VPN Operational Security

VPN Control Plane Protection

VPN Data Plane Protection

Scaling and Convergence of the Layer 3 MPLS VPN Service

Globenet Routing Convergence Strategy

Edge Router Capabilities

## **IPv6 VPN Service Design**

IPv6 VPN Design Within a Globenet Region

IPv6 VPN Design Across Globenet Regions

## **ATM Pseudowire Design**

## **Quality of Service Design**

VPN and Internet SLA

QoS Design in the Core Network in the EMEA, AsiaPac, and South America  
Regions

QoS Design in the Core Network in North America

QoS Design in the Core Network Across Regions

QoS Design on the Network Edge for Layer 3 MPLS VPN and Internet

QoS Design for the Interprovider VPN with Telecom Kingland

QoS Design for Multicast Traffic

QoS Design for the IPv6 VPN

# **Table of Contents**

Pseudowire QoS Design for ATM Trunking

SLA Monitoring and Reporting

## **MPLS Traffic Engineering Design**

Setting the Maximum Reservable Bandwidth on Each Link

Automatic Setup and Provisioning of a Full Mesh of TE LSPs

Dynamic Traffic Engineering LSP Bandwidth Adjustment

TE LSP Path Computation

MPLS Traffic Engineering in North America

MPLS Traffic Engineering in the AsiaPac, EMEA, and South America Regions

Reoptimization of TE LSPs

Traffic Engineering Scaling Aspects

Use of Refresh Reduction

Monitoring TE LSPs

Last-Resort Unconstrained Option

TE Design for ATM Pseudowires

## **Network Recovery Design**

MPLS TE Fast Reroute Design Within Globenet Regions

Set of Backup Tunnels

Failure of a PE Router Supporting ATM Pseudowires

Network Recovery for IPv6 VPN

## **Virtual POP Design**

Conversion of the Johannesburg POP to a VPOP

Attributes of the Inter-AS TE LSPs

Globenet VPOP Migration Strategy

Reoptimization of Inter-AS TE LSPs

Routing onto Inter-AS TE LSPs

VPOP QoS Design

Recovery of Inter-AS TE LSPs

# **Table of Contents**

Policy Control at ASBR Boundaries

Africa Telecom VPOP

Design Lessons to Be Taken from Globenet

## **Chapter 6 Large Enterprise Design Study**

EuroBanks Network Environment

Description of the Branch Office

Description of an Office Location

Description of a Core Network POP

Description of the Data Centers

Description of the Metro Connections in the UK

EuroBank Design Objectives

EuroBank Network Core Routing Design

Host Routing

Layer 3 MPLS VPN Service Design

Intersubsidiary and DataCenter Connectivity Requirements

Office Location Requirements

EuroBank Group VPN Definitions

Data Center Layer 3 MPLS VPN Design

POP Layer 3 MPLS VPN Design

Core MP-BGP Design

UK Office Location Layer 3 MPLS VPN Design

Routing Within Each Multi-VRF VRF

EuroBank Multicast Deployment and Design

EuroBank Brokerage Encryption Deployment and Design

Layer 3 MPLS VPN Design for VoIP

Architecture of the Managed Telephony Service

On-Net Voice Call Within a EuroBank VPN

# **Table of Contents**

On-Net Voice Call Across Two EuroBank VPNs

Layer 3 MPLS VPN Design Within PhoneNet and EuroBank Off-Net Voice Calls

## **Quality of Service Design**

EuroBanks Service Classes

Traffic Classification in Offices and Data Centers

Sub-100-Mbps QoS Policy

100+Mbps QoS Policy

Gigabit Ethernet Link QoS Policy

QoS Design on the Access for Branches

Design Lessons to Be Taken from EuroBank

## **Appendix A: References**

## **Index**
