Selecting MPLS VPN Services

Table of Contents

Contents

Introduction

Part I: Business Analysis and Requirements of IP/MPLS VPN

Chapter 1 Assessing Enterprise Legacy WANs and IP/VPN Migration

- Current State of Enterprise Networks

- Evolutionary Change of Enterprise Networks

- Acme, a Global Manufacturer

- New WAN Technologies for Consideration by Acme

- Convergence Services

- Summary

Chapter 2 Assessing Service Provider WAN Offerings

- Enterprise/Service Provider Relationship and Interface

- Investigation Required in Selecting a Service Provider

- Service Management

- Summary

Chapter 3 Analyzing Service Requirements

- Application/Bandwidth Requirements

- Backup and Resiliency

- Enterprise Segmentation Requirements

- Access Technologies

- QoS Requirements

- Subscriber Network QoS Design

Table of Contents

Security Requirements

Multiprovider Considerations

Extranets

Case Study: Analyzing Service Requirements for Acme, Inc.

Summary

References

Part II: Deployment Guidelines

Chapter 4 IP Routing with IP/MPLS VPNs

Introduction to Routing for the Enterprise MPLS VPN

Site Typifying WAN Access: Impact on Topology

Case Study: BGP and EIGRP Deployment in Acme, Inc.

Summary

References

Chapter 5 Implementing Quality of Service

Introduction to QoS

QoS Tool Chest: Understanding the Mechanisms

Building the Policy Framework

IP/VPN QoS Strategy

Identification of Traffic

QoS Requirements for Voice, Video, and Data

The LAN Edge: L2 Configurations

Case Study: QoS in the Acme, Inc. Network

QoS Reporting

Summary

References

Chapter 6 Multicast in an MPLS VPN

Introduction to Multicast for the Enterprise MPLS VPN

Mechanics of IP Multicast

Table of Contents

Multicast Deployment Models

Multicast in an MPLS VPN Environment: Transparency

Case Study: Implementing Multicast over MPLS for Acme

What Happens When There Is No MVPN Support?

Summary

References

Chapter 7 Enterprise Security in an MPLS VPN Environment

Setting the Playing Field

Comparing MPLS VPN Security to Frame Relay Networks

Issues for Enterprises to Resolve When Connecting at Layer 3 to
Provider Networks

Basic Security Techniques

Distributed DoS, Botnets, and Worms

Case Study Selections

Summary

References

Chapter 8 MPLS VPN Network Management

The Enterprise: Evaluating Service Provider Management Capabilities

The Enterprise: Managing the VPN

The Service Provider: How to Meet and Exceed Customer Expectations

Summary

References

Chapter 9 Off-Net Access to the VPN

Remote Access

IPsec Access

Supporting Internet Access in IP VPNs

Case Study Selections

Summary

References

Table of Contents

Chapter 10 Migration Strategies

- Network Planning

- Implementation Planning

- On-Site Implementation

- Case Study Selections

- Summary

Part III: Appendix

Appendix: Questions to Ask Your Provider Regarding Layer 3

IP/MPLS VPN Capability

- Coverage and Topology

- Customer Edge Router Management

- Network Access, Resiliency, and Load Balancing

- QoS Capability

- Multicast Capability

- Routing Protocol Capability

- Security

- Software Deployment Processes

- Inter-Provider IP/VPN

- IPv6

- MTU Considerations

- Hosting Capability

- IP Telephony PSTN Integration

- IP Telephony Hosted Call Agent

- Remote and Dial Access

- Internet Access

- Other Network Services
