

# Deploying Cisco Voice over IP Solutions

Learn real-world voice-over-IP deployment  
solutions and strategies from the Cisco experts

# Deploying Cisco Voice over IP Solutions

**Edited by: Jonathan Davidson and Tina Fox**

**Contributing Authors:**

**Phil Bailey**

**Rommel Bajamundi**

**Wayne Cheung**

**Thu Dao**

**Jonathan Davidson**

**Tina Fox**

**Sachin Gupta**

**Christina Hattingh**

**Ted Huff**

**Stephen Liu**

**Curt Mah**

**Greg Mercurio**

**Jeremy Pollock**

**Jim Rushton**

**Ravindar Shankar**

**Cisco Press**

Cisco Press  
800 East 96th Street  
Indianapolis, IN 46240 USA

# Deploying Cisco Voice over IP Solutions

## Table of Contents

### Contents

### Introduction

### Part I: Network Design Considerations

#### Chapter 1 Understanding Traffic Analysis

- Traffic Theory Basics

- Traffic Models

- Selecting Traffic Models

- Applying Traffic Analysis to VoIP Networks

- End-to-End Traffic Analysis Example

- Summary

#### Chapter 2 Understanding Echo Analysis

- Echo Analysis Basics

- Locating an Echo

- Effects of Network Elements on Echo

- Echo Cancellation

- Customer Expectations About Echo

- Service Provider Expectations About Echo

- Configuring Gateways to Minimize Echo

- Process for Locating and Eliminating Echoes

- Echo Analysis Case Study

- Summary

#### Chapter 3 Understanding Quality of Service for Voice over IP

- Quality of Service Requirements

- Packet Classification

# **Table of Contents**

- QoS Queuing Mechanisms
- Fragmentation and Interleaving
- Traffic Shaping
- IP RTP Header Compression
- Differentiated Services for VoIP
- VoIP QoS over Leased Lines (Using PPP) Example
- VoIP QoS over Frame Relay Networks Example
- VoIP QoS over ATM Example
- RSVP Dynamic Classification and Admission Control
- Summary

## **Chapter 4 Understanding Call Admission Control**

- Call Admission Control
- CAC Mechanisms
- Local CAC Mechanisms
- Measurement-Based CAC Mechanisms
- Resource-Based CAC Mechanisms
- Feature Combinations, Interactions, and Sequencing
- Summary

## **Part II: Network Design Strategies**

### **Chapter 5 Designing Static Dial Plans for Large VoIP Networks**

- Components of Large H.323 Networks
- Design Methodology for Large-Scale Dial Plans
- H.323 Network Components in Large-Scale Dial Plans
- Dial Plan Call Routing Tools and Features
- Example: Use of Translation Rules, Technology Prefixes, and Dial-Peer Failover
- Example: Implementing an International Dial Plan
- Summary

### **Chapter 6 Designing a Long-Distance VoIP Network**

# **Table of Contents**

Long-Distance VoIP Network Features and Benefits

Long-Distance VoIP Design Methodology

Step 1: Identify Services

Step 2: Determine Carriers or Providers

Step 3: Determine Interconnection Types

Step 4: Determine Call Topologies

Step 5: Identify Deployment Scenario

Step 6: Identify Functional Areas

Step 7: Identify Required Hardware and Software Components

Step 8: Identify Design and Scalability Issues

Step 9: Configure and Provision Components

Summary

## **Part III: Network Services**

### **Chapter 7 Managed Multiservice Networks and Packet Voice VPNs**

Managed Multiservice Networks

Peer-to-Peer Managed Multiservice Networks

Packet Voice Virtual Private Networks

Summary

### **Chapter 8 Fax Services**

Traditional Fax over Circuit-Switched Networks

Cisco Store and Forward Fax

T.38 Real-Time Fax and Never-Busy Fax Service

Summary

### **Chapter 9 Unified Messaging**

Market Scope

Unified Messaging Features

Components of a Unified Messaging System

Typical uOne Call Flows

Deploying Unified Messaging Services in a Service Provider Environment

# **Table of Contents**

Deploying Unified Messaging for Dial Internet Access  
Deploying Unified Messaging for Dedicated Internet Access  
Redundancy and Load Balancing  
Unified Messaging Configuration Examples  
Summary

## **Chapter 10 Prepaid Services**

Debit Card Application Overview  
Debit Card Application Functional Call Flow  
Architecture for Internally Managed Prepaid Services  
Prepaid Services Configuration Guidelines  
Internally Managed Prepaid Services Call Example  
Using OSP for Clearinghouse Services  
OSP Clearinghouse Operation and Call Flow  
Architecture for OSP  
OSP Clearinghouse Solution Configuration Guidelines  
Troubleshooting OSP  
OSP Clearinghouse Configuration Examples  
Summary

## **Part IV: Appendixes**

Appendix A: Erlang B Traffic Model  
Appendix B: Extended Erlang B Traffic Model  
Appendix C: TCL IVR Scripts
