MPLS Configuration on Cisco IOS Software

Table of Contents

Table of Contents

Foreword

Introduction

Chapter 1 MPLS Overview

- Unicast IP Forwarding in Traditional IP Networks

- Overview of MPLS Forwarding

 - Architectural Blocks of MPLS

- MPLS Terminology

- MPLS Control and Data Plane Components

- MPLS Operation

 - MPLS Label Assignment

 - LDP Session Establishment

 - MPLS Label Distribution with LDP

 - MPLS Label Retention

- Special Outgoing Label Types

- Penultimate Hop Popping

- Frame-Mode MPLS

 - Frame-Mode MPLS Operation

 - Loop Prevention in Frame-Mode MPLS

- Cell-Mode MPLS

 - Cell-Mode MPLS Operation

 - Loop Detection in Cell-Mode MPLS

Table of Contents

ATM VC-Merge

Cell Interleave with VC-Merge Implementation

Chapter 2 Basic MPLS Configuration

Frame-Mode MPLS Configuration and Verification

Basic Frame-Mode MPLS Overview, Configuration, and Verification

Frame-Mode MPLS over RFC 2684 Routed PVC

Cell-Mode MPLS over ATM Overview, Configuration, and Verification

Basic Cell-Mode MPLS Configuration and Verification

Configuring Cell-Mode MPLS with VC-Merge

Configuring MPLS Over ATM Without VC-Merge

MPLS Over VP Tunnels Configuration and Verification

Implementing Cell-Mode MPLS with BPX8600 and 7200 as Label Switch
Controller

Command Reference

Chapter 3 Basic MPLS VPN Overview and Configuration

VPN Categories

MPLS VPN Architecture and Terminology

MPLS VPN Routing Model

VRF: Virtual Routing and Forwarding Table

Route Distinguisher, Route Targets, MP-BGP, and Address Families

MPLS VPN Control Plane Operation

MPLS VPN Data Plane Operation

MPLS VPN Basic Configuration

Configuration of CE Routers

Configuring MPLS Forwarding and VRF Definition on PE Routers

Final VRF Configuration on PE1-AS1 Router

Verification of VRF Configuration on PE routers

Configuration of BGP PE-PE Routing on PE Routers

Table of Contents

BGP PE-PE Routing Final Configuration on PE1-AS1 and PE2-AS1 Router

Verification and Monitoring of BGP PE-PE Routing on PE Routers

Configuration of P Router

Label Verification and Control and Data Plane Operation

Outbound Route Filters

Command Reference

Chapter 4 PE-CE Routing Protocol Static and RIP

Static PE-CE Routing Overview, Configuration, and Verification

Configuration Flowchart to Implement Static PE-CE Routing

Configuring Static PE-CE Routing

Static PE-CE Routing Final Device Configurations for CE Routers
(CE1-A and CE2-A)

Static PE-CE Routing Final Device Configuration for Provider Routers
(P1-AS1 and P2-AS1)

Static PE-CE Routing Final Device Configurations for PE Routers
(PE1-AS1 and PE2-AS1)

Verification of Static PE-CE Routing

Static PE-CE Routing Command Reference

RIPv2 PE-CE Routing Overview, Configuration, and Verification

Configuration Flowchart to Implement RIPv2 PE-CE Routing

Configuring RIPv2 PE-CE Routing

RIPv2 PE-CE Routing Customer Edge CE1-A and CE2-A Configuration

RIPv2 PE-CE Routing Provider Edge (PE1-AS1 and PE2-AS1) Configuration

Verification of RIPv2 PE-CE Routing

Control Plane Forwarding Operation

Data Forwarding Operation

RIPv1 PE-CE Routing Configuration and Verification

RIPv1 PE-CE Routing PE1-AS1 and CE1-A Final Configuration

Verification of RIPv1 PE-CE Routing

Table of Contents

RIP PE-CE Routing Command Reference

Chapter 5 PE-CE Routing Protocol OSPF and EIGRP

OSPF PE-CE Routing Protocol Overview, Configuration and Verification

Traditional OSPF Routing Model

MPLS VPN or OSPF Superbackbone Concept

OSPF Route-Propagation Using MPLS VPN Superbackbone Concept

OSPF Down Bit and Domain Tag

Configuring and Verifying OSPF PE-CE Routing

OSPF Sham-Links

OSPF PE-CE Routing Command Summary

EIGRP PE-CE Routing Protocol Overview, Configuration, and Verification

EIGRP Route Propagation

Configuration Flowchart for EIGRP PE-CE Routing

Routing Loops and Suboptimal Routing

BGP Cost Community Feature and EIGRP Site of Origin

EIGRP PE-CE Routing Command Summary

Chapter 6 Implementing BGP in MPLS VPNs

BGP PE-CE Routing Protocol Overview, Configuration and Verification

Configuration Flowchart to Implement BGP PE-CE Routing for VPN Sites with Unique and Same AS Numbers

Implementing BGP PE-CE Routing for VPN Sites with Unique and Same AS Numbers

Implementing Route-Reflectors in MPLS VPN Networks

RR Deployment Methods

Configuring P Router as RR Only for VPNv4 Prefixes (Option 3)

Partitioned RRs

Table of Contents

RRs and Peer Groups

BGP Confederations

Case StudyHub and Spoke MPLS VPN Network Using BGP PE-CE
Routing for Sites Using Unique AS Numbers

Base MPLS VPN Configuration

Hub and Spoke MPLS VPN Configuration for Sites Using Unique AS Numbers

Verifying MPLS VPN Hub and Spoke Routing for Sites Using Unique AS
Numbers

Case StudyHub and Spoke MPLS VPN Network with Sites Using
Same AS Numbers

Verifying MPLS VPN Hub and Spoke Routing for Spoke Sites Using Same AS
Numbers

Command Reference

Chapter 7 Inter-Provider VPNs

Overview of Inter-Provider VPNs

Option 1: Inter-Provider VPN Using Back-to-Back VRF Method

Control Plane Forwarding in Option 1

Data Forwarding in Option 1

Configuring Back-to-Back VRF Method

Option 2: Inter-Provider VPNs Using ASBR-to-ASBR Approach

Option 2a: ASBR-ASBR Approach Using Next-Hop-Self Method

Option 2b: ASBR-to-ASBR Approach Using Redistribute Connected

Option 2c: Multi-Hop MP-eBGP Between ASBRs

Option 3: Multi-Hop MP-eBGP Between RR and eBGP Between ASBRs

Control Plane Forwarding in Option 3

Data Forwarding in Option 3

Configuration Flowchart to Implement Option 3

Configuration and Verification of Option 3

Option 4: Non-VPN Transit Provider

Table of Contents

Control Plane Forwarding in Option 4

Data Forwarding in Option 4

Configuration Flowchart in Option 4

Configuration and Verification of Option 4

Case StudyInter-AS Implementing Route-Reflector and BGP
Confederation in Provider Networks

Case StudyMulti-Homed Inter-AS Provider Network

Command Reference

Chapter 8 Carrier Supporting Carriers

Carrier Supporting Carriers Overview

Label Exchange Methods in CSC Architecture

Deployment Scenarios with CSC Architecture

CSC NetworkCustomer Carrier Not Running MPLS

CSC NetworkCustomer Carrier Running MPLS

CSC NetworkCustomer Carrier Providing MPLS VPN Service

CSC Architecture Benefits

Command Reference

Chapter 9 MPLS Traffic Engineering

TE Basics

MPLS TE Theory

MPLS TE Overview

RSVP with TE Extensions: Signaling

RSVP Operation in MPLS TE

Constraint-Based Routing and Operation in MPLS TE

Maximum Versus Available Bandwidth

Constraint-Based SPF

OSPF Extension for MPLS TE

IS-IS Extensions for MPLS TE

Table of Contents

Configuring MPLS TE

MPLS TE Configuration Flowchart

Configuring Dynamic Paths and Explicit Paths with MPLS TE

Verification of MPLS TE Tunnel Creation

Final Configurations for Dynamic and Explicit Tunnels with MPLS TE

Unequal Cost Load Balancing Across Multiple TE Tunnels

MPLS TE Fast ReRoute Link Protection

Implementing MPLS VPNs over MPLS TE

Verification of MPLS VPN over TE with PE to PE Tunnels

Configuration of MPLS VPN over TE with PE to P Tunnels

Command Reference

Chapter 10 Implementing VPNs with Layer 2 Tunneling Protocol Version 3

L2TPv3 Overview

Operation of L2TPv3

L2TPv3 Modes of Operation

L2TPv3 Prerequisites

Tunnel Server Card Operation on GSR 12000 Series Routers When
Implementing L2TPv3

L2TPv3 Header Format

Configuring L2TPv3 Tunnels for Layer 2 VPN

Configuring L2TPv3 Static Tunnels

Verification of Static L2TPv3 Tunnel Operation

Final Device Configuration for L2TPv3 Static Tunnels

Configuring L2TPv3 Dynamic Tunnels

Verification of Dynamic L2TPv3 Tunnel Operation

Final Device Configurations for L2TPv3 Dynamic Tunnels

Implementing Layer 3 VPNs over L2TPv3 Tunnels

Configuring L3VPN over L2TPv3 Tunnels

Table of Contents

Verification for L3VPN over L2TPv3 Tunnels

Final Configurations for L3VPN over L2TPv3 Tunnels for PE Routers

Command Reference

Chapter 11 Any Transport over MPLS (AToM)

Introduction to Layer 2 VPNs

VPWS and VPLS

Pseudo Wire Reference Model

AToM Terminology

How AToM Works

Implementing AToM for Like to Like Circuits

ATM over MPLS

Ethernet over MPLS

PPP over MPLS

HDLC over MPLS

Frame Relay over MPLS

L2 VPN Any to Any Interworking

Bridged Interworking Mode

Routed Interworking Mode

L2 VPN Interworking Limitations

Configuring Layer 2 VPN Interworking

Ethernet to VLAN Interworking

Frame Relay to AAL5 Interworking

Frame Relay to PPP Interworking

Final Configurations for Devices to Implement Frame Relay to PPP
Interworking

Frame Relay to VLAN Interworking

AAL5 to VLAN Interworking

Local Switching

Configuration Flowchart for Local Switching Among Like Circuits

Table of Contents

Local SwitchingFrame Relay to Frame Relay

Local SwitchingEthernet to Ethernet

Local SwitchingATM to ATM

Local SwitchingEthernet to Frame Relay

Command Reference

Chapter 12 Virtual Private LAN Service (VPLS)

VPLS Overview

VPLS Components

VPLS Operation

VPLS TopologySingle PE or Direct Attachment

Configuration Flowchart for Direct Attachment VPLS

Direct Attachment VPLS Configuration Scenario 1Using Port and 802.1Q
VLAN Modes

Direct Attachment VPLS Configuration Scenario 2Using Dot1q Tunnel
Mode and Layer 2 Protocol Tunneling

Hierarchical VPLSDistributed PE Architecture

Configuration Flowchart for Hierarchical VPLS Using Q-in-Q Mode

Hierarchical VPLS Configuration Scenario 1802.1Q Tunneling (Q-in-Q)

Verification of VPLS Service

PE Configurations

u-PE Configurations

CE Configurations for Customer A and Customer B

Command Reference

Chapter 13 Implementing Quality of Service in MPLS Networks

Introduction to Quality of ServiceClassification and Marking

Classification and Marking

Congestion Management, Congestion Avoidance, Traffic Shaping, and
Policing

Table of Contents

MPLS QoS Implementation

MPLS QoS Operating Modes

Uniform Mode

Pipe Mode

Short Pipe Mode

Long Pipe Mode

Summary of MPLS QoS Modes

Modular QoS CLI: Configuration of QoS on Cisco Routers

Configuration and Implementation of MPLS QoS in Uniform Mode
and Short Pipe Mode Operation

Implementing Uniform Mode

Implementing Short Pipe Mode

Implementing MPLS QoS for Layer 2 VPN Implementations

Implementing QoS with ATOM

Implementing QoS with VPLS

Implementing QoS with L2TPv3

Command Reference

Chapter 14 MPLS Features and Case Studies

Case Study 1: Implementing Multicast Support for MPLS VPNs

Operation of Multicast MPLS VPN

Configuration of Multicast Support for MPLS VPN

Implementing Multicast Support for MPLS VPNs

Verifications for Case Study 1

Case Study 2: Implementing Multi-VRF CE, VRF Selection Using
Source IP Address, VRF Selection Using Policy-Based Routing,
NAT and HSRP Support in MPLS VPN, and Multicast VPN Support
over Multi-VRF CE

Configuration of Core Devices in Case Study 2

Theory and Configuration of Features in Case Study 2

Table of Contents

Verifications for Case Study 2

Final Configurations for Case Study 2

Case Study 3: Implementing Layer 2 VPNs over Inter-AS

Topologies Using Layer 2 VPN Pseudo-Wire Switching

Layer 2 VPN Pseudo-Wire Switching Theory and Configuration

Verifications for Case Study 3

Final Configurations for Case Study 3

Case Study 4: Implementing Layer 3 VPNs Over Layer 2 VPN

Topologies and Providing L2 VPN Redundancy

Layer 3 VPN over L2 VPN Configuration

Implementing L2 VPN Redundancy

L2 VPN Pseudo-Wire Redundancy Configuration for Customer A Traffic
from PE1-A to PE2-A

Verifications for Case Study 4

Final Configurations for Case Study 4

Case Study 5: Implementing Dynamic Layer 3 VPNs Using mGRE Tunnels

Configuring Layer 3 VPN Over mGRE Tunnels

Verifications for Case Study 5

Final configurations for Layer 3 VPN over mGRE Tunnels for PE Routers

Case Study 6: Implementing Class-Based Tunnel Selection with MPLS Traffic Engineering

Implementing Class-Based Tunnel Selection

Configuring CBTS

Verification of Class-Based Tunnel Selection

Final Configurations for Case Study 6

Case Study 7: Implementing Hub and Spoke Topologies with OSPF

Hub and Spoke with OSPFv2: Configuration of CE Routers and Spoke PE
Routers

Table of Contents

Configuration of Hub-PE Router and Verification of OSPF Hub and Spoke
Operation

Case Study 8: Implementing Hub and Spoke Topologies with EIGRP

Configurations for the CE and Spoke PE Routers

Configurations for the Hub PE Router and Verification of EIGRP Hub and
Spoke Operation

Case Study 9: Implementing VPLS Services with the GSR 12000 Series

Theory and Operation of VPLS on a GSR 12000 Series

GSR VPLS Packet Forwarding

GSR VPLS Requirements and Configuration

Case Study 10: BGP Site of Origin

Command Reference
