EIGRP Network Design Solutions

Table of Contents

Contents

Introduction

Part I: EIGRP Technology

Chapter 1 EIGRP Concepts and Technology

- EIGRP Concepts Metrics and Distances

- Initial IP EIGRP Configuration

- EIGRP Concepts Metrics and Distances

- DUAL The Heart of EIGRP

- Summary

Chapter 2 Advanced EIGRP Concepts, Data Structures, and Protocols

- EIGRP Transport Mechanisms and Protocols

- EIGRP Neighbors

- Discovering New Neighbors

- EIGRP Topology Table

- Building Routing Tables from EIGRP Topology Tables

- Summary

Chapter 3 IPX EIGRP

- IPX EIGRP Configuration and Route Redistribution

- Integration of IPX RIP Metrics into IPX EIGRP and IPX Route Selection

- IPX SAP Integration

- Backward Compatibility of IPX EIGRP and IPX SAP

- Summary

Chapter 4 AppleTalk EIGRP

Table of Contents

AppleTalk EIGRP Configuration and Route Redistribution

Integration of RTMP and AppleTalk EIGRP and AppleTalk Route Selection

Summary

Part II: Designing Enterprise EIGRP Networks

Chapter 5 Scalability Issues in Large Enterprise Networks

Case Study 1 Large Enterprise Network Experiencing Meltdown Situations

Query Boundaries What They Are and Why They Are Useful

Monitoring the Stability of Your EIGRP Network

Case Study 2 Diffused Computation in Hierarchical Networks

Summary

Chapter 6 EIGRP Route Summarization

Case Study Connectivity Loss Following Private IP Address Deployment

Summary

Chapter 7 Route Filters

Case Study Partial Connectivity over ISDN Backup

EIGRP Route Filters

Query Boundaries Established by EIGRP Route Filters

Case Study DUAL-Mart ISDN Dial-Backup Network Redesign

Prefix Lists Improved Route Filters

Case Study Network Meltdown after Frame Relay

Summary

Chapter 8 Default Routes

IP Default Routing and IOS Specifics

Default Routes and Default Candidates in EIGRP

EIGRP Default Routes Design Examples

Case Study GreatCoals Network

Summary

Chapter 9 Integrating EIGRP with Other Enterprise Routing Protocols

Table of Contents

Case Study 1 Large Network with No Addressing Structure

Case Study 2 Large Network with No Layering

Case Study 3 Network Migrating from Another Vendor to Cisco

Case Study 4 Service Provider with a Large Number of Routes

Redistribution between Routing Processes

Various Redistribution Designs and Potential Caveats

Case Study Solutions

Summary

Chapter 10 Designing Scalable IPX EIGRP Networks

IPX Route Filters

IPX Default Routes

Controlling Route Redistribution between IPX Routing Protocols

Case Study GreatCoals

Case Study Reducing IPX EIGRP Diameter in GreatCoals Network

Case Study Combining IPX RIP and IPX EIGRP in an Access Network

Summary

Chapter 11 Designing Scalable AppleTalk EIGRP Networks

AppleTalk EIGRP Route Filters

Other AppleTalk EIGRP Scalability Options

Case Study Frisco Systems, Inc.

Case Study Solution

Summary

Part III: Running EIGRP over Switched WAN and Dial-Up Networks

Chapter 12 Switched WAN Networks and Their Impact on EIGRP

Case Study 1A Large Number of EIGRP Neighbors over a Frame Relay Link

Broadcast Emulation on Switched WAN (Pseudobroadcasting)

Layer 2 to Layer 3 Mapping in WAN Environment

Table of Contents

Troubleshooting Neighbor Map Problems

Subinterfaces

Summary

Chapter 13 Running EIGRP over WAN Networks

Case StudyImproving Neighbor Loss Detection

Case StudyWAN Link Overload Due to EIGRP Traffic

Case StudyPartial Connectivity over Frame Relay

Running EIGRP over Various Switched WAN Technologies

Summary

Chapter 14 EIGRP and Dial-Up Networks

Case StudyA Simple Dial-Up Network

Case StudyRoute Flaps in a Dial-Up Environment

Case StudyDial-Out Requirements

Case StudyEIGRP Use in a Dial-Backup Scenario

Summary

Chapter 15 Secure EIGRP Operation

Case StudyCollecting Usernames and Passwords through a Fake Server

Case StudyDenial-of-Service Attack on a Core Network

EIGRP MD5 Authentication

Summary
