

Cisco LAN Switching Configuration Handbook

Second Edition

A complete, concise reference for implementing the most important features of the Cisco Catalyst family of switches

Cisco LAN Switching Configuration Handbook

Steve McQuerry, CCIE No. 6108

David Jansen, CCIE No. 5952

Dave Hucaby, CCIE No. 4594

Cisco LAN Switching Configuration Handbook

Table of Contents

Contents

Introduction

Chapter 1 CLI Usage

1-1: Cisco Internetwork Operating System (IOS) Software

Using Cisco IOS Software

1-2: ROM Monitor

Using the ROM Monitor Command Set

Chapter 2 Switch Functionality

2-1: Catalyst Switch Families

Catalyst 2000 Series

Catalyst 3000 Series

Catalyst 4500 Series

Catalyst 6500

2-2: Switched Campus Network Designs

Catalyst Switch Families

Cisco Validated Designs: Campus

Chapter 3 Supervisor Engine Configuration

3-1: Prompts and Banners

Configuration of Prompt

Configuration of Banner

Feature Example

3-2: IP Addressing and Services

Configuring an IP Management Address

Table of Contents

- Configuring a Default Gateway
- Setting Up DNS Services or Host Tables
- Configuring HTTP Services
- Feature Example

3-3: Passwords and Password Recovery

- Configuration of Passwords
- Feature Example
- Password Recovery: Procedure 1
- Feature Example
- Password Recovery on IOS Devices: Procedure 2
- Feature Example

3-4: Managing Modules

- Viewing Modules
- Accessing Modules
- Resetting Modules
- Powering Modules Up and Down

3-5: File Management and Boot Parameters

- Navigating File Systems
- Deleting Files from Flash
- Copying System Files
- File System Boot Parameters
- Alias Commands

3-6: Redundant Supervisors

- Forcing a Change to the Standby Supervisor
- Synchronizing IOS Images
- Synchronizing Boot Parameters

3-7: Cisco Discovery Protocol

- Configuration of CDP
- Feature Example

3-8: Time and Calendar

Table of Contents

- System Time Configuration
 - Setting the System Time Manually
 - Setting the System Time Through NTP
 - Example

Chapter 4 Layer 2 Interface Configuration

4-1: Switching Table

- Configuration
- Displaying Information About the Switching Table
- Switching Table Example

4-2: Port Selection

- Configuration
- Port Selection Example

4-3: Ethernet

- Configuration
- Ethernet Example
- Displaying Information About Layer 2 Interfaces

4-4: EtherChannel

- Configuration
- EtherChannel Example
- Displaying Information About EtherChannels

Chapter 5 Layer 3 Interface Configuration

5-1: Layer 3 Switching

5-2: Layer 3 Ethernet Interfaces

- Configuration
- Verifying the Configuration
- Feature Example

5-3: Layer 3 EtherChannels

- Configuration
- Verifying the Channel

Table of Contents

Feature Example

5-4: WAN Interfaces

Configuration

Configuring an Enhanced FlexWAN Interface

Configuring a SPA Interface Processor (SIP) / Shared Port Adapter (SPA)
WAN Interface

Configuring a Packet-over-SONET Interface

Verifying Configurations

Feature Example

5-5: Layer 3 Virtual Interfaces

Configuring a VLAN Interface

Configuring Subinterfaces

Verifying Configurations

Feature Example

5-6: Routing Tables

Configuration

Verifying Routes

Chapter 6 VLANs and Trunking

6-1: VLAN Configuration

Creation of an Ethernet VLAN

Feature Example

6-2: VLAN Port Assignments

Configuring Static VLANs

Configuring Dynamic VLANs

Verifying VLAN Assignments

6-3: Trunking

Enabling Trunking

Specifying VLANs to Trunk

Verifying Trunks

Table of Contents

Feature Example

6-4: VLAN Trunking Protocol

Enabling VTP for Operation

Setting VTP Passwords

Changing VTP Modes

Enabling VTP Pruning

Changing VTP Versions

Verifying VTP Operation

Feature Example

6-5: Private VLANs

Configuring Private VLANs

Configuring Private Edge VLANs

Verifying Private VLAN Operation

Feature Example

Chapter 7 Spanning Tree Protocol (STP)

7-1: STP Operation

STP Process

STP Tiebreakers

Path Costs

STP Port States

STP Topology Changes

Improving STP Stability

STP Operation Example

7-2: STP Configuration

Displaying Information About STP

STP Configuration Examples

Poor STP Root Placement

STP Load Balancing

7-3: STP Convergence Tuning

Table of Contents

Configuring STP Convergence Tuning

7-4: Navigating the Spanning-Tree Topology

Chapter 8 Configuring High Availability Features

8-1: Route Processor Redundancy (RPR/RPR+)

Configuration

Displaying Information About RPR

8-2: Non-Stop Forwarding/Supervisor Switchover (NSF/SSO) with
Supervisor Redundancy

SSO/NSF Configuration

Displaying Information About SSO and NSF

8-3: Router Redundancy with HSRP

Configuration

HSRP Example

Displaying Information About HSRP

8-4: Fast Software Upgrade (FSU) and Enhanced Fast Software
Upgrade (eFSU)

Chapter 9 Multicast

9-1: Multicast Addressing

9-2: IGMP Snooping

Configuration

IGMP Snooping Example

Displaying Information About IGMP Snooping

Chapter 10 Server Load Balancing (SLB)

10-1: SLB

Configuration

SLB Example

Displaying Information About SLB

10-2: SLB Firewall Load Balancing

Table of Contents

Configuration

Firewall Load-Balancing Example

Displaying Information About Firewall Load Balancing

10-3: SLB Probes

Configuration

Displaying Information About SLB Probes

Chapter 11 Controlling Traffic and Switch Access

11-1: Broadcast Suppression

Configuring Broadcast Suppression

Verifying Configuration

Feature Example

11-2: Protocol Filtering

Configuration

Verification

Feature Example

11-3: Port Security

Configuration

Verification

Feature Example

11-4: VLAN Access Control Lists

IOS VACL Configuration

Verification

Feature Example

11-5: Switch Authentication

Configuration

Verification

Feature Example

11-6: Access Class

Configuration

Table of Contents

Verification

Feature Example

11-7: SSH Telnet Configuration

Configuration

Verification

Feature Example

11-8: 802.1X Port Authentication

Configuration

Feature Example

11.9: Layer 2 Security

Port Security

Feature Example

Verification

DHCP Snooping

Feature Example

Verification

Dynamic ARP Inspection

Feature Example

Verification

Chapter 12 Switch Management

12-1: Logging

Configuration

Logging Example

Displaying Information About Logging

12-2: Simple Network Management Protocol

Configuration

SNMP Example

Displaying Information About SNMP

12-3: Switched Port Analyzer

Table of Contents

SPAN Configuration

RSPAN Configuration

SPAN Examples

Displaying Information About SPAN

12-4: Power Management

Configuration

Displaying Information About Power Management

12-5: Environmental Monitoring

12-6: Packet Tracing

Configuration

Packet-Tracing Example

Chapter 13 Quality of Service

13-1: QoS Theory

Layer 2 QoS Classification and Marking

Layer 3 QoS Classification and Marking

Catalyst Switch Queuing

13-2: QoS Configuration

Catalyst 2000/3000 Configuration

All Other Catalyst Configuration

Displaying Information About QoS

13-3: QoS Data Export

Configuration

QoS Data Export Example

Displaying Information About QoS Data Export

Chapter 14 Voice

14-1: Voice Ports

Configuration

Example

Displaying Information About Voice Ports

Table of Contents

14-2: Voice QoS

Access Layer Configuration

Distribution and Core Layer Configuration

Voice QoS Example

Appendix A: Cabling Quick Reference

Back-to-Back Connections

Ethernet Connections

Asynchronous Serial Connections

T1/E1 CSU/DSU Connections

Appendix B: Well-known Protocol, Port, and Other Numbers

Index
