Designing and Deploying 802.11n Wireless Networks

Table of Contents

Contents

Introduction

Part I: Fundamental Concepts

Chapter 1 Introduction to Wireless LANs

- Wireless LAN Markets and Applications

- Benefits of Wireless Networks

- Wireless Network Technologies

- Other Wireless Network Technologies

- Wireless LANs: A Historical Perspective

Chapter 2 Radio Wave Fundamentals

- Radio Wave Attributes

- RF System Components

- RF Signal Propagation

- RF Mathematics

Chapter 3 Wireless LAN Types and Components

- Types of Wireless LANs

- Wireless LAN Components

- Network Infrastructure Components

Chapter 4 Wireless LAN Implications

- Security Vulnerabilities

- Radio Signal Interference

- Impacts of Multipath Propagation

- Roaming Issues

- Battery Limitations

Table of Contents

Interoperability Problems

Installation Issues

Part II: The 802.11 Standard

Chapter 5 Introduction to IEEE 802.11 and Related Standards

The Importance of Standards

The IEEE 802 LAN Standards Family

IEEE 802.11 Features

Chapter 6 IEEE 802.11 Medium Access Control (MAC) Layer

Primary 802.11 MAC Layer Functions

Connectivity

Timing and Synchronization

RTS/CTS

802.11 MAC Frame Structures

MAC Frame Types

Interoperability

Chapter 7 IEEE 802.11 Physical Layers

802.11 Physical Layer Architecture

802.11 Physical Layer Functions

Legacy 802.11 Physical Layers

HT-OFDM (802.11n)

Interoperability

Part III: Wireless Network Design

Chapter 8 Planning a Wireless LAN Deployment

Project Management Principles

Wireless LAN Deployment Planning Steps

Step 1: Defining the Project Scope

Step 2: Developing the Work Breakdown Structure

Step 3: Identifying Staffing

Step 4: Creating a Schedule

Step 5: Developing a Budget

Table of Contents

Step 6: Evaluating Risks

Step 7: Analyzing Feasibility

Executing the Project

Evaluating the Outcome of the Project

Chapter 9 Defining Requirements for a Wireless LAN

Requirements Attributes

Requirements Definition Steps

Step 1: Gathering Information

Step 2: Analyzing Requirements

Step 3: Documenting Requirements

Step 4: Obtaining Requirements Approval

Chapter 10 System Architecture Considerations

Architectural Considerations

Wireless Access Networks

Distribution Systems

Voice over WLAN Systems

Application Connectivity

Chapter 11 Range, Performance, and Roaming Considerations

Range Versus Performance

Range Considerations

Performance Considerations

Roaming Considerations

Chapter 12 Radio Frequency Considerations

Frequency Band Selection

Transmission Channel Settings

Difficult-to-Cover Areas

Radio Signal Interference Reduction

Chapter 13 Security Considerations

Security Elements

Encryption

Table of Contents

Authentication

Rogue Access Point Detection

RF Shielding

Wireless Security Policies

Part IV: Wireless Network Installation and Testing

Chapter 14 Test Tools

Tool Considerations

Spectrum Analyzers

Signal Coverage Testers

Wireless Protocol Analyzers

Chapter 15 Performing a Wireless Site Survey

Wireless Site Survey Considerations

Reviewing Requirements

Selecting Site Survey Tools

Obtaining Floor Diagrams

Inspecting the Facility

Assessing the Existing Network Infrastructure

Identifying Potential Radio Signal Interference

Defining Signal Values for Acceptable Signal Coverage

Identifying Optimum Access Point Antenna Installation Locations

Writing an RF Site Survey Report

Chapter 16 Installing and Configuring a Wireless LAN

Wireless LAN Installation Considerations

Planning the Installation

Staging the Components

Installing Ethernet Switches and Cabling

Installing Access Points

Testing the Installation

Documenting the Installation

Chapter 17 Testing a Wireless LAN

Table of Contents

Wireless LAN Testing Considerations

Signal Coverage Testing

Performance Testing

In-Motion Testing

Security Vulnerability Testing

Acceptance/Verification Testing

Simulation Testing

Prototype Testing

Pilot Testing

Test Documentation

Part V: Operational Support Considerations

Chapter 18 Managing a Wireless LAN

Operational Support Considerations

Help Desk

Network Monitoring

Maintenance

Engineering

Configuration Management

Trouble Ticket Coordination

Preparing for the Transfer to Operational Mode

Chapter 19 Troubleshooting a Wireless LAN

Troubleshooting Methodology

Connection Problems

Performance Problems

Chapter 20 Preparing Operational Support Staff

Support Staff Considerations

Availability of Existing Staff

Experience Requirements

Education and Training Requirements

Certifications
