# Reading Reimagined

More than an eBook, Revel is an interactive learning environment that delivers a blend of textbook material, author content, interactive exercises and assignments integrated throughout.

Revel offers students the opportunity to test their understanding and apply concepts as they work their way through the text.

❝ If (other universities) ask me whether it's worth them paying for it, I would say yes."

**Academic lead/Associate Head of Department**

Pearson

How can Revel work for you?

24/7 Access

Revel content is available both on and offline, and the app gives students the ability to switch between devices as they move through their day. Providing students with immediate feedback, Revel is ideal for use as preparation for, during or after contact time.
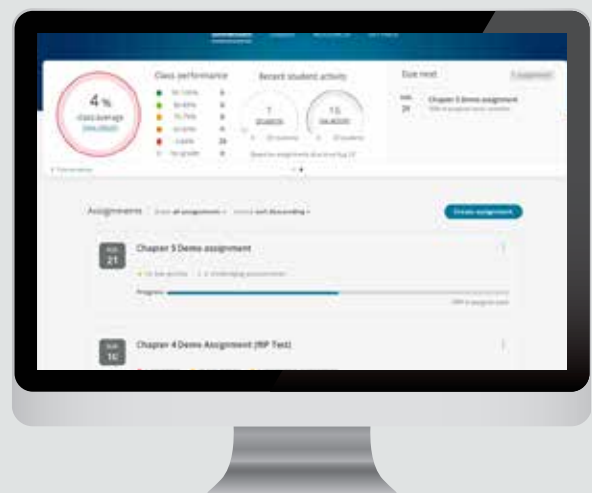

Encourages Active Learning

Revel improves the learning experience and is designed to help every student come to class ready to learn. The content is interspersed with activities, multimedia and assignments to test their understanding. As well as space for reflection on what they have read.
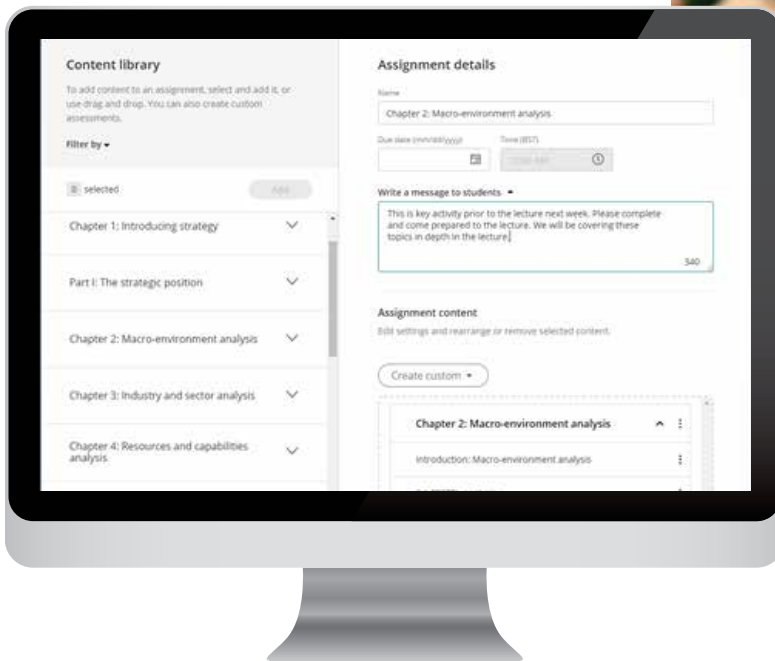

Performance Dashboard

Lecturers can keep track of students' progress via the Performance Dashboard, which allows you and your colleagues to immediately see which students are reading and engaging with the assessment content. By identifying those students who have not completed assignments or may be struggling, Revel enables you to take effective action.

> 66 Students were far more willing to engage with reading ... it definitely had a positive impact in terms of accessibility, in terms of readability and engagement."

Academic lead/Associate Head of Department

> 66 The knowledge we learn and the way it's taught to us is far more useful than just general reading."

Management student, Swansea University

> 66 The pedagogical design is very strong... we learn by practicing, we learn by doing. This takes eBooks to the next level."

Educator, University of Sheffield

Flexible Teaching

Revel is designed to help you enhance the learning experience - highlight important texts, add links to direct student focus on important areas and customise questions to ensure higher relevance. Revel provides flexibility to tailor course reading to your timetable and set assigned chapters to cohorts easily.

What lecturers say about Revel:

" It is a fabulous way to integrate blended learning which is now a hot topic in education.

A very valuable learning and teaching resource."

Academic lead, Swansea University

" My experience of the training and the technical support has been really very positive. The Pearson support team has always been available on phone and email whenever I've needed any assistance. I would highly recommend Revel to my colleagues."

Dr. Nicki Newman, University teacher in marketing, University of Sheffield

" The dashboard gives you the confidence as a lecturer that [students] are actually engaging.

The biggest benefit is that I can go into the dashboard and ... see actually what the students have been doing and tailor the appropriate course of action or support."

Academic lead/ Associate Head of Department

" Using Revel to prepare for the seminar helped to create time to discuss the question in depth.

I was pleasantly surprised by the extent I could sit back and let the group discuss the question among themselves. Normally they wouldn't have reached the stage of reading academic work before a seminar."

Educator, Swansea University

Hear from Management students from Swansea University:
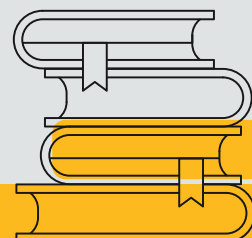

" Definitely feel more confident going into a lecture!

" If the lecturer asks a question, I'm more willing to put my hand up because I'm not scared that I've totally got the wrong end of the stick."

" I would highly recommend it... especially for those whose English is not their first language."
